NOTICE

Save as otherwise provided as per the laws of India, the services provided by e-Mudhra shall, at any time, be in accordance with the applicable laws in India and shall be subject to the jurisdiction of various courts, tribunals and authorities in India, including but not limited to the Information Technology Act, 2000, its rules and regulations and any amendment thereto.

Any person who uses the digital signature certificate in an improper manner or violate the provisions detailed under this e-Mudhra Certification Practice statement shall render himself/herself liable for civil/criminal action and be proceeded against as per the provisions of applicable civil/criminal laws and IT act or any other act/acts that are relevant and in force from time to time. Attention is also drawn to the IT Act Chapter VIII wherein the duties of subscribers are specified.
DEFINITIONS

The following definitions are to be used while reading this CPS. The following terms shall bear the meanings assigned to them hereunder and such definitions shall be applicable to both the singular and plural forms of such terms:

- “e-Mudhra” is a brand name, refers to the Certifying Authority, owned by eMudhra Consumer Services Ltd, which is licensed by Controller of Certifying Authorities (CCA), Govt. of India under Information Technology Act 2000, and includes the associated infrastructure as mentioned in this CPS for providing Certification & Trust services.
- “eMudhra Consumer Services Ltd” refers to a company incorporated under the Indian Companies Act, 1956 and a subsidiary of eMudhra Ltd.
- Unless otherwise specified the word ‘Act’ in this CPS refers to IT Act 2000 and amendments thereof.
- “Applicant” or “User” means a person, entity or organization that has requested for a digital signature certificate to be issued by e-Mudhra.
- “Auditor” means any Audit organizations appointed by e-Mudhra and empanelled by Controller of Certifying Authorities (CCA) for auditing of LicensedCA.
- “digital signature” means authentication of any electronic record by a subscriber by means of an electronic method or procedure in accordance with the provisions of section 3 of the IT Act;
- “Digital signature certificate” or the “certificate” means a digital signature certificate issued by e-Mudhra to the Applicant. It also means a Digital Signature Certificate issued under sub-section (4) of Section 35 of IT act.
- “CA” refers to e-Mudhra as licensed by CCA to issue digital signature certificate.
- “Controller” means the Controller of Certifying Authorities appointed as per Section 17 subsection (1) of the Act.
- Unless otherwise specified, the word “CPS” used throughout this document refers to Certification Practice Statement of e-Mudhra.
- “Privatekey” means that part of cryptographic key pair generated for creating Digital Signature and is held privately by the subscriber.
- “Registration Authority” or “RA” means an entity or organization trusted under e-Mudhra hierarchy and has right to verify the credentials of the applicant/subscriber before forwarding to e-Mudhra for issuance and revocation of certificate etc..
- “Subscriber” means a person, entity or organization in whose name the Digital Signature Certificate is issued by e-Mudhra.

Note: The contextual meaning of the terms may be considered for such terms that are used in this CPS but not defined above.
EXECUTIVE SUMMARY OF e-Mudhra CPS

1. e-Mudhra Certification and Trust Services

eMudhra Consumer Services Limited’s (eMudhra CSL) core business goals are:

- To change the rule of the game of consumer servicing by providing either totally unique services or existing services with material difference to the consumer;
- To enable consumers to manage their financial and statutory obligations and need through technology enabled process and by changing the way they have been transacting;
- To enable and empower consumer by aiding with secured technology that will help them achieving their financial goals.

As the Indian consumer base is exponentially growing, to manage the volume, eMudhra CSL is proposing to build appropriate technology engines which will provide for a non-linear model to deliver the services needs of consumers. It has also been proposed that eMudhra CSL will provide digital signature certificates to consumers so that they can transact over the internet in a secured way. Digital Signature protected online transaction concept is reasonably new and with Digital Signature Certificates the consumers will be very comfortable in using the online for any of his financial transactions or e-commerce transactions. Besides eMudhra CSL’s other services offerings such as Online Tax Filing services, Electronic Payment services etc will enhance the value of the digital signature certificate acquired by the consumer.

This Certification Practice Statement (CPS) describes the practices followed with regard to the management of the lifecycle of the certificates issued by e-Mudhra CA

2. Rights and Obligations

Except for notice by the applicant to the contrary, an applicant, applying for a Certificate through e-Mudhra CA, understand and agree that, at all times during the acceptance and the validity of the certificate, he shall be bound by this CPS and for any person who relies on the information provided in the Certificate, for the following:

a. The information submitted by the certificate applicant to e-Mudhra and included in the certificate is considered to be true and accurate as submitted by the applicant.
   b. No other person has ever had access to subscriber’s private key.

The subscriber undertakes that, by accepting the certificate issued by the e-Mudhra CA, shall use it in a trustworthy system and he shall be solely responsible for his possession and use of private key and shall take such measures necessary to prevent any unauthorized use, access, tampering or loss of the private key. The user shall request for revocation at all times where there has been evidence of theft, tampering, loss and compromise of the user’s private key.
3. Liability

Without limiting subscriber’s obligations stated in this CPS, subscribers are liable for any misrepresentation they make in the digital signature certificates and on which third parties reasonably rely believing the same to be true.

1. INTRODUCTION
This Certification Practice Statement details the practices that e-Mudhra adopts to provide Digital Signature Certificates and related services. The CPS is the principal practice statement governing the services provided by e-Mudhra and establishes conformance to the requirements of the Indian Information Technology Act, 2000 (IT Act). All transactions facilitated by electronic means viz., electronic data interchange and electronic means of communication, falling under the umbrella of “electronic commerce”, are granted legal recognition under the Information Technology Act.

1.1 Services Offered
E-Mudhra operates a PKI hierarchy to offer a range of ‘Trust’ services. The following services are being offered by e-Mudhra:

1.1.1 Retail Trust Services
E-Mudhra issues various classes of Certificates. These would be issued to Individuals or individual representing organizations or specific devices (web servers) based on the validation requirements specified by e-Mudhra. The certificates issued under this service can be used for file signing, digital signatures, encryption, web server authentication, code signing, web form signing, online transaction and e-commerce. The process of encryption certificate issuance is mentioned in Section 1.8.7.2 of this CPS.

1.1.2 Managed PKI Services
As business on the net has grown and communication in the electronic form plays a critical role in day-to-day business of any organization, it is necessary for organizations to setup a secure communication environment using PKI-based technologies. e-Mudhra plans to provide a Managed PKI solution which would enable organizations to manage certificate issuance to their employees/partners/affiliates/customers with minimal investment.

E-Mudhra Managed PKI solution would provide enterprises with a cost-efficient solution to a PKI system that can be adapted to the enterprises requirements without having to operate a Certification Authority set-up. The enterprises can outsource to e-Mudhra the issuance of digital signature certificates and other administrative tasks such as digital signature certificate generation, validation, renewal and revocation of certificates issued to their customers, employees and partners.

1.1.3 OCSP (Online Certificate Status Protocol) Validation Services
E-Mudhra offers OCSP validation services to relying parties for certificate status verification in real time. The fee towards OCSP service is as defined in section 2.5 of this CPS.
1.2 Certifying Authority
The term “Certifying Authority” or CA as used in this CPS, represents e-Mudhra as the entity, licensed by the Controller of Certifying Authorities (CCA), Govt. of India. e-Mudhra may issue several “classes” of certificates depending on the level of ‘trust’ requirements. It is to be noted that:

- e-Mudhra CA certificate will be signed by CCA. e-Mudhra CA in turn will create and sign the public keys of various class level sub-CAs representing each class of digital signature certificate. e-Mudhra CA may also create and sign end user subscriber certificates for specific classes of certificate.

- The responsibilities related to the certificate issued under any class of e-Mudhra hierarchy rests with e-Mudhra.

In carrying out this responsibility e-Mudhra may enter in to contractual agreements with external parties like RAs, Managed PKI customers, partners etc.

1.3 Registration Authority
Registration Authorities (RAs) are entities appointed by e-Mudhra to evaluate and either approve or reject digital signature certificate applications in accordance with this CPS. The Registration Authorities may in turn have personnel to process and evaluate the application requests, but the requests shall be forwarded to the e-Mudhra only through the designated RA.

1.4 Components Of e-Mudhra Public Hierarchy
e-Mudhra public hierarchy consists of e-Mudhra CA (the CA certificate signed by CCA). e-Mudhra CA in turn signs the following sub-CAs representing various classes of certificates:

- e-Mudhra Class 1 Individual CA
- e-Mudhra Class 2 Individual CA
- e-Mudhra Class 2 Organization CA
- e-Mudhra Class 3 Individual CA
- e-Mudhra Class 3 Organization CA
- e-Mudhra Class 3 DeviceCA

The subscriber can choose any one of the classes based on his requirements. For Managed PKI services or for any future purposes, if need be, e-Mudhra would offer an arrangement whereby some more specific Sub-CAs are created for representing various class of certificates.

Notes:
1. e-Mudhra may choose to have only a subset of the hierarchy and services mentioned based on commercial and operational considerations. The service and offerings mentioned above could be changed in the subsequent versions of the CPS.
2. e-Mudhra reserves the sole right to accept applications for its certificates and issue digital signature certificates. The validation and verification procedures for each class of certificates will be as mentioned in this CPS and in accordance with the IT Act.
1.5 Role Of CPS And Other Documents

This CPS explains specific practices of e-Mudhra with respect to issuance and management of the certificates. It covers the following areas:

- Appropriate application for various classes of certificates.
- Assurance level associated with each class.
- Obligation of e-Mudhra CA, Registration Authority (RA), Subscriber and Relying parties.
- Legal matters that are covered in subscriber agreements and relying party agreements.
- Audit and related security and practices reviews undertaken by company.
- Methods used for identification and verification of subscriber for various certificates.
- Operational procedures for certificate applications, issuance, acceptance, revocation, and renewal.
- Physical, personnel, cryptographic private key and logical security.
- Operational security procedures for audit logging, records retention and disaster recovery.
- Certificate and certificate revocation list (CRL) content
- Administration of CPS, including methods of updating it.

Security and operational policy and procedure documents and manuals are some of the other documents that in addition to the CPS define the practices and processes of e-Mudhra CA operations.

- Technical Specifications of CA System: The principles which define e-Mudhra PKI security requirements and standards followed.
- IT Security Policy: Defines the guidelines covering the security implementation across various areas such as Physical, Key Operations, People etc. and also the audit requirements.
- Operating Procedure Manuals: Sets the operations guidelines governing the PKI operations.
- Key Ceremony Guide: Key Management Operations guidelines policy and manuals gives the detail procedure for carrying out various activities.
- Agreement documents including the Subscriber and the RA agreements are the legal agreements that bind the various participants such as users, RAs to e-Mudhra standards.

e-Mudhra may rely on the ancillary documents as may be required in addition to the CPS for referring to any specific detailed standards.

1.6 Relationship With Controller Of Certifying Authority

The Root Certifying Authority of India (RCAI) of CCA digitally signs the public keys of licensed CA’s in India. The CCA operates the Root Certifying Authority of India (RCAI) under section 18(b) of the IT-Act. e-Mudhra PKI, is by design, subordinate to the RCAI. As part of the CA licensing process defined in the Act, the CCA has issued a CA certificate to e-Mudhra. This CA Certificate signed by the RCAI, authenticates the Public Key of e-Mudhra CA and can be downloaded from the CCA’s website [http://www.cca.gov.in/] as well as e-Mudhra's website www.e-Mudhra.com/repository/cacerts].
1.7 Compliance With IT Act

e-Mudhra CA complies with Indian IT Act, Rules and Regulations. e-Mudhra CA practices described in the CPS are designed to comply with the prevalent and applicable provisions under the Act. As required by IT Act 2000, this CPS conforms the adherence to framework provided in ITU RFC 1422 (X.509 version 3 certificates) in order to make interoperation easier for person who is intending to use e-Mudhra services.

1.8 Policy Overview

1.8.1 e-Mudhra Class 1 Individual

Customers - Class 1 Individual certificates are issued to individuals with valid e-mail addresses.

Validation – The validation process is carried out as per section 3.1.10 of this CPS. Class 1 Individual certificates are appropriate for digital signatures and encryption, where assurance level is low.

Assurance level - For Class 1 Individual certificates, the verification of the certificate request represent a simple check of the certainty of the subject name within the repository, plus a verification of the e-mail address.

1.8.2 e-Mudhra Class 2 Individual

Customers - Class 2 Individual certificates are issued to Individuals.

Validation - The validation process is carried out as per section 3.1.10 of this CPS. Class 2 Individual certificates are appropriate for digital signatures and encryption where assurance level is medium.

Assurance level: Class 2 Individual certificate issuance processes utilize various procedures to obtain probative evidence of the identity of individual applicants. These validation procedures provide strong assurance of an applicant’s identity.

1.8.3 e-Mudhra Class 2 Organization

Customers - Class 2 Organization certificates are issued to personnel representing organizations.

Validation - The validation process is carried out as per section 3.1.10 of this CPS. Class 2 Organization certificates are appropriate for digital signatures and encryption where assurance level is medium.

Assurance level: Class 2 Organization certificate processes utilize various procedures to obtain probative evidence of the identity of organizations. These validation procedures provide strong assurance of an organizations’ identity.
1.8.4 e-Mudhra Class 3 Individual

**Customers** - Class 3 Individual certificates are issued to individuals.

**Validation** - The validation process is carried out as per section 3.1.10 of this CPS. Class 3 Individual certificates are appropriate for digital signatures and encryption requiring a high assurance about the subscriber’s identity.

**Assurance level:** Class 3 Individual certificate issuance processes make use of various procedures to obtain strong confirmation of the identity of individual applicants such as physical presence. These validation procedures provide stronger guarantee of an applicant’s identity. Utilizing validation procedure by the RAs boosts the practical uses and trustworthiness of Class 3 Individual certificates.

1.8.5 e-Mudhra Class 3 Organization

**Customers** - Class 3 Organization Certificates are issued to personnel representing organizations, administrators for CAs and RAs.

**Validation** - The validation process is carried out as per section 3.1.10 of this CPS. The validation procedures for Class 3 Organization certificates issued to organizations are based on a confirmation that the subscriber organization does in fact exist, that the organization has authorized the certificate application, and that the person submitting the certificate application is authorized to do so.

Class 3 Organization certificates are appropriate for digital signatures and encryption requiring a high assurance about the subscriber’s identity.

**Assurance level:** Class 3 Organization certificate issuance processes make use of various procedures to obtain strong confirmation of the identity of individual applicants such as physical presence. These validation procedures provide stronger guarantee of an applicant’s identity. Utilizing validation procedure by the Registration Authorities boosts the practical uses and trustworthiness of Class 3 certificates.

1.8.6 e-Mudhra Class 3 Device

**Customers** - Class 3 Device Certificates are applied for by authorized individuals (administrators) who are responsible for the security of the corresponding private keys and are appropriate for server authentication; message, software, and content integrity; and confidentiality encryption. Device certificates are used for Object signing and/or Secure Web Server.

**Validation** - The validation process is carried out as per section 3.1.10 of this CPS. The validation procedures for Class 3 Device Certificates issued to devices are based on a confirmation that the subscriber organization does in fact exist, that the organization has authorized the certificate application, and that the person submitting the certificate application is authorized to do so.
**Assurance level:** Class 3 Device certificate issuance processes make use of various procedures to obtain strong confirmation of the identity of the server.

### 1.8.7 Types of Certificates

e-Mudhra can issue five types of certificates: Signature, Encryption, SSL Client, SSL Server, and Code Signing.

#### 1.8.7.1 Signature Certificate

The signature certificate is corresponding to the signing private key. It will be used by individuals or organizations for signing purpose. The key pair will be generated by applicant/subscriber in a secure medium and is inherent to keep his private key in safe custody. The signature certificate is issued by e-Mudhra after the validation process mentioned in this CPS. The relying parties can make use of this certificate for signature verification.

#### 1.8.7.2 Encryption Certificate

The encryption key pair is used by the subscriber for receiving encrypted messages which is encrypted using subscriber’s public key. The subscriber fills in the application and submits to eMudhra or it’s authorized RAs along with the identification and address proof. The RA verifies the application, id proof and address proof and approves the request. The Subscriber provides a password in the portal for protecting the encryption certificate. The server generates the encryption key, escrows and makes it available for the customer in the portal. The subscriber needs to login with the credentials sent to his digital id and download the encryption certificate from the portal.

#### 1.8.7.3 SSL Client Certificate

SSL client certificates are used for the authentication of browser client by a secure server. The issuance process will be as referred in Section 3.1.10.6.

#### 1.8.7.4 SSL Server Certificate

SSL server certificates are digital identifications containing information about web server and the organization that is owning the server’s web content. An SSL server certificate enables
users to authenticate the server, check the validity of web content, and establish a secure connection. The issuance process will be as referred in Section 3.1.10.6.

1.8.7.5 Code Signing Certificate
Code signing certificate helps users to develop confidence in downloaded code. It allows users to identify the signer to determine if codes have been modified by someone other than the signer. Signed codes can be Java Applets, Javascripts, plugins, ActiveX controls of any other kind of code. The issuance process will be as referred in Section 3.1.10.6.

1.9 Identification
This CPS is called e-Mudhra Certification Practice Statement. e-Mudhra manages the life-cycle of digital signature certificates under e-Mudhra, and the contact details are mentioned in section 1.12.1 of this CPS.

1.10 Community And Applicability
The community governed by this CPS is e-Mudhra Public Key Infrastructure (PKI) that accommodates a large, public community of users with diverse needs for communication and information security.

The parties involved in e-Mudhra PKI are:
- e-Mudhra CA that issue certificates.
- Entities that function as RAs
- Entities that are certified as applicants or subscribers.
- Entities that rely on the certificates (relying party).

1.10.1 Certifying Authority and Hierarchy
The term Certifying Authority refers to all entities signing certificates in accordance with e-Mudhra PKI hierarchy pertaining for each class of certificates, as mentioned under section 1.4 of this CPS.

1.10.2 Registration Authorities
A Registration Authority (“RA”) is a local office/Agents or partners appointed by e-Mudhra that receives the applications for the Certificate (as prescribed in the IT Act, 2000) from the applicant/subscriber and verifies the details contained in the application. If the verification is successful, then the request is digitally signed and forwarded to the Sub-CA under e-Mudhra PKI recommending generation of a Digital signature certificate for the verified applicant/subscriber.

The Managed PKI Customers (enterprises) would act as Registration Authority for their affiliated entities.

1.10.3 End Entities
The end entities / end users of the Digital signature certificates in business and other communication applications are:

Applicants - An applicant is a person, entity, or organization that has applied for, but has not yet been issued an e-Mudhra Digital signature certificate.
Subscribers - A Subscriber is a person, entity, or organization that has been issued e-Mudhra Digital Signature Certificate.

Relying parties – A Relying Party is a person, entity, or organization that relies on or uses e-Mudhra Digital signature certificates and/or any other information provided in e-Mudhra repository to verify the identity and public key of a subscriber and/or use such public key to send or receive encrypted communications to or from a subscriber.

1.11 Community And Applicability
The e-Mudhra PKI community includes, CAs, sub-CAs, RAs, Subscribers, and Relying Parties. This CPS is applicable to all the members of the e-Mudhra PKI community and it defines the practice statement for use of such digital signatures in order of hierarchy.

e-Mudhra digital signature certificates are intended to support the security needs as mentioned in this CPS. e-Mudhra shall not be responsible for any liabilities howsoever or whatsoever arising from the use of any Certificate unless e-Mudhra has expressly undertaken to assume such liabilities in this CPS.

1.11.1 Prohibited Applications

e-Mudhra certificates are not for use for any equipments operated in hazardous conditions or under fail proof conditions (eg. Nuclear facilities, aircraft navigation etc) where any failure could directly lead to grievous injury, death or severe environmental damage.

In addition specific categories or types of certificates are to be used only for the designated purposes such as e-Mudhra CA certificates are to be used only for CA function, end subscriber certificates cannot be used for CA function.

More generally, certificates shall be used only to the extent use is consistent with all applicable laws, rules and regulations and in particular shall be used only to the extent permitted by applicable export or import laws.

Also, with respect to X.509 Version 3 Certificates, the key usage extension is intended to limit the technical purposes for which a private key corresponding to the public key in a certificate may be used.
1.12 Contact Details

1.12.1 Specification Administration Organization
This CPS is administered by e-Mudhra. The CPS shall be revised from time to time as and when needed by the CA, upon approval from the CCA, with sufficient notification to the end users.

e-Mudhra can be contacted at the following address.

e-Mudhra,
eMudhra Consumer Services Ltd.,
3rd Floor, Sai Arcade,
Outer Ring Road,
Devarabeesanahalli,
Bangalore - 560036
Karnataka, India
Phone: +91 80 43360000
Fax: +91 80 42275306
Email: info@e-mudhra.com
Website: www.e-mudhra.com

1.12.2 Contact person
e-Mudhra can be contacted at the address specified in section 1.12.1 of this CPS.

For more information, refer to e-Mudhra’s website at www.e-mudhra.com or contact administrator at info@e-mudhra.com.

1.12.3 Person Determining CPS Suitability for the Policy
The CPS suitability is approved and decided by the Policy Approval Committee of e-Mudhra. However the CPS can be adopted only after the CCA approval.
2. GENERAL PROVISIONS

The responsibilities of various parties, participating in the e-Mudhra PKI as established by this CPS has been defined in this section. The obligations of various parties have been detailed.

2.1 Obligations

2.1.1 CA Obligations

The CPS specifies obligations for e-Mudhra CA throughout this document. Broadly the e-Mudhra CA shall have the following obligations:

- Performing activities as per the policies, procedures and process as designed to secure the certificate management process. (including certificate issuance, suspension, activation, revocation, CRL publication and audit trails)
- To protect its private key from compromise.
- Issuing a Digital Signature Certificate to the applicants who has submitted an application, and verified & validated by the e-Mudhra appointed RA
- Revocation of the Digital Signature Certificate upon the request from the subscriber or RA as per the terms and conditions in e-Mudhra CPS.
- Publishing the CRL regularly as per the terms and conditions in this CPS document.
- To Maintain the CCA approved CPS with previous versions / revisions as and when changes are made.
- Creation & maintenance of Audit Trail of CA operations
- To ensure that all requirements, representations, warranties as mentioned in this CPS are adhered when performing the Certificate issuance, operations and CA services.
- e-Mudhra shall be responsible for all PKI related operations performed by RA.
- To submit certificate/CRL issued by e-Mudhra to the CCA for its National Repository of Digital certificates.

In addition e-Mudhra will make reasonable efforts to bind the subscriber and relying party through the Subscriber Agreements and the Relying Party Agreement. Subscriber (whether direct or Managed PKI) will not be enrolled or issued a certificate without consent/agreement to the Subscriber Agreement. Similarly the relying party will be asked to consent to the Relying Party Agreement before being able to validate the certificates.

2.1.2 RA obligations

RAs assist CA by performing validation functions, approving or rejecting Certificate Applications, requesting revocation of Certificates, and approving renewal requests.

- Implement the practices described in this CPS.
- Verifying the applications and validating the supporting/relevant documents as provided by the applicant and if necessary entering of relevant details online to e-Mudhra.
- Before forwarding the digitally signed approval for issuance of certificate by e-Mudhra, RA shall check for any known infringement by the applicant for Trademark,
• Authenticate requests from subscribers for revocation of certificates and send timely revocation requests to e-Mudhra.
• Request of Revocation from other subscriber is to be forwarded to e-Mudhra for timely revocation. RA to ensure the authenticity of such requests.
• Collect the relevant documents for the corresponding class of certificates from applicant as mentioned in this CPS.
• Store the subscriber applications as required and defined in the IT Act 2000 and subsequent amendments.

2.1.3 Subscriber Obligations
The Subscriber shall have the following obligations:
• To ensure that the information / data provided in the application for certificate request is true, accurate, current and without errors, omissions or misrepresentations
• To ensure the use of only those secure medium as specified in the e-Mudhra CPS to Generate the key pair (except in case of Encryption Certificate)
• Use the certificate for authorized purposes consistent with this CPS.
• To protect his private key in a trustworthy secure medium.
• Confirm acceptance of the Digital signature Certificate generated by e-Mudhra when all information contained in the certificate, as provided by the applicant, is validated as true.
• Notify e-Mudhra immediately when the information included in the Subscriber’s Digital Signature Certificate is inaccurate, false or incomplete.
• Notify e-Mudhra immediately upon any actual or suspected compromise of the Subscriber’s private key.
• Comply with any other additional obligations as mentioned in the Subscriber agreement.
• To keep the private key safe and protect it from any disclosure or unintended use.
• Read and accept the policies and procedures as specified in this CPS.

2.1.4 Relying Party Obligations
Relying Party obligations apply to Relying Parties by way of e-Mudhra CA Relying Party Agreement.

• Relying Parties must independently assess the appropriateness of the use of a Digital signature certificate for any given purpose.
• Relying Parties must not use certificates beyond the limitations and for applications which have been prohibited section 1.11.1 of this CPS.
• Relying parties must use appropriate utilities or tools to perform digital signature verification or other operations. The utilities/ tools should be able to identify the certificate chain and verifying the digital signature on all certificates in the chain and only on successful verification should rely on the certificate.
• Relying party must consent to the Relying Party Agreement before proceeding with relying on certificates.
• The relying parties have to determine the appropriateness of the use of a certificate. The Agreement states that e-Mudhra CAs and RAs are not responsible for assessing the appropriateness of the use of a Certificate.
2.1.5 Repository obligations

e-Mudhra is responsible for the repository functions for all e-Mudhra CAs in its PKI hierarchy. All certificates issued by e-Mudhra shall be published in its repository and updated on a regular basis. The updated CRLs shall be published in the e-MudhraRepository once in every week on Friday, however if there is any revocation of DSC in between then it will be published immediately in the corresponding CRL. Thus the CRL will contain updates based on revocations done.

2.2 Liability

2.2.1 Certifying Authority Liability

e-Mudhra provides the service on best effort basis. The security and suitability of the service will not be guaranteed by e-Mudhra. e-Mudhra shall not be liable for delay or omission to issue/revoke/activate a digital certificate or any other consequences arising from events beyond the control of e-Mudhra. e-Mudhra shall not be liable for any damages arising from its operations or use of certificates it issues. e-Mudhra shall not be liable, for any certificates obtained from it, by representing false or inaccurate or misleading or untrue information.

All warranties and any disclaimers thereof, and any limitations of liability among e-Mudhra, its Intermediaries (RAs/partners) and their respective customers shall be in strict adherence to the terms and conditions of the Agreement amongst them.

2.2.1.1 Warranties to Subscribers and Relying Parties

e-Mudhra’s Subscriber Agreements and that issued by the intermediaries (like RAs .) and Managed PKI Customers shall include, a warranty to subscribers that:

- No information is materially misrepresented or introduced in the certificate by the entities approving the certificate application or issuing the certificate.
- The entities issuing and approving certificates have exercised reasonable care in managing the application and creating the certificate and no errors in the information in the certificates that was introduced by these entities.
- The certificates conform to certificate management requirements such as revocation services, use of a repository and other material requirements as laid in the CPS.

Similarly e-Mudhra’s Relying Party Agreements contain a warranty to relying parties that:

- Information in or incorporated by reference in Digital Signature Certificate, except non verified subscriber Information, is accurate as provided by the subscriber
- The requirements of this CPS will be complied with while issuing the certificate by e-Mudhra

2.2.1.2 Disclaimers of Warranties

e-Mudhra Subscriber agreements along with the relying party agreements, expressly disclaims, within lawfully permissible limits, all warranties including warranty of merchantability or fitness for a particular purpose.

2.2.1.3 Limitations of liability

The verification for certificate issuance by e-Mudhra is based on reasonable effort basis and neither e-Mudhra CA or RA can underwrite the activities or conduct of the subscribers.
e-Mudhra CA shall not be liable for any indirect, exemplary, special, punitive, incidental, and consequential losses, damages, claims, liabilities, charges, costs, expenses or injuries (including without limitation loss of use, data, revenue, profits, business and for any claims of Subscribers or Users or other third parties including Relying parties).

e-Mudhra CA shall not be liable for any delay, default, failure, breach of its obligations under the Subscribers Agreement, Relying Party Agreement and Registration Authority Agreement

2.2.1.4 CA Liability Caps
Notwithstanding anything contained, the maximum aggregate liability of CA towards all parties including the Relying Party (whether in contract, tort or otherwise) and subscribers shall under no circumstances exceed the cost of particular class of certificate and the same shall be included in all subscriber and relying party agreements as permitted by Law

2.2.1.5 Force Majeure
To the extent permitted by applicable law, e-Mudhra CA's subscriber agreements, Registration authority agreement and Relying party agreements include, and other subscriber agreements shall be subject to the conditions of force majeure clause. e-Mudhra CA, Registration Authority and Relying party shall not be responsible for any delay/default/inadequate performance/ non-performance / failure in its performance under the Subscribers Agreement, Relying Party Agreement or Registration Authority Agreement if the same is caused by extraordinary weather conditions or other natural catastrophes, war, riots, strikes, lockouts or other industrial disturbances, acts of any governmental agencies.

2.2.2 RA Liability
The obligations and the liabilities of the RA including its warranties towards CA while assisting the CA in issuing certificates to the subscribers are more particularly set out in the Registration Authority Agreement signed between the parties

2.2.3 Subscriber Warranties and Private Key Compromise

2.2.3.1 Subscriber Warranties
Subscriber agreement of e-Mudhra mandates its subscribers to warrant that:
- At the time of digital signature creation the certificate is valid and operational and not Expired or Revoked.
- The subscriber's private key was not disclosed and haven't been accessed by any third party.
- The Subscriber has only provided information in the certificate application which is true and accurate and the same is contained in the certificate.
- The Private Key shall not be used for any unlawful and unauthorized transactions.
- The Digital certificate obtained by the end user subscriber is not used for digitally signing any Sub CA certificates, Certificates and CRL.

2.2.3.2 Private Key Compromise (PKC)
The IT Act 2000 mandates that the subscriber shall be solely responsible for the protection of their designated private key. The end subscriber is required to take necessary precautions to ensure storage of the private keys in a secure medium and to protect against disclosure.
2.2.4 Relying Party Liability

All relying parties, who rely on the information provided in the Digital Signatures, under any Agreement, are required to make an informed decision based on the sufficiency of the information before them and e-Mudhra shall not guarantee or be liable for any decision taken by a relying Party.

2.3 Financial Responsibility

2.3.1 Indemnification by Subscribers

e-Mudhra subscriber agreement mandates all its Subscribers to, within lawfully permissible limits; indemnify e-Mudhra CAs or RAs for:

- Any inaccurate, false or misrepresentation of information in the subscriber’s certificate application, as provided by the subscriber.
- Suppression of a material fact on the certificate application, if the omission was made negligently or with intent to deceive any party,
- Failing to protect the private key of the subscriber and failure to use a trustworthy system or failing to take necessary precautions to prevent the compromise, loss, disclosure, modification, or unauthorized use of the subscriber’s private key.
- Any infringement of IPR of a third party caused by the subscriber’s use of name not limiting to use of Common name, domain name, digital communication address).

2.3.2 Indemnification by relying parties

e-Mudhra’s relying party agreements mandates all relying parties, to indemnify, within lawfully permissible limits, e-Mudhra CAs or RAs for:

- Unreasonable reliance, by the relying party, on a certificate under the given circumstances
- For failing to perform the legal obligations of relying party as detailed in this CPS.
- Failure by the relying party to check the status of the certificate (revoked or expired).

2.3.3 Fiduciary Relationships

All e-Mudhra Subscriber Agreements and relying Party Agreements disclaim, within lawful limits, any fiduciary relationship deemed between the e-Mudhra CA’s or RA’s on one side and the Subscriber or relying Party on the other.

2.3.4 Administrative Processes

e-Mudhra agrees that, during the subsistence of this Agreement, it shall have financial resources and infrastructure sufficient to perform the operations and duties thereof. The Managed PKI Customers must put in place an insurance program, either with an insurance carrier or a self insured retention, which shall cover a commercially reasonable level for errors and omissions. The above requirement is not applicable for government entities.

2.4 Interpretation And Enforcement

Notwithstanding anything to the contrary provided in law, this CPS shall be construed in accordance with the Provisions of the Information technology Act, 2000 and subsequent amendments to it.
2.4.1 Governing Law
This CPS is governed by the IT Act 2000 and all rules, regulations, amendments and any guidelines issued by the appropriate authority to it from time to time.

2.4.2 Severability, Survival, Merger, Notice
It is hereby required under this CPS that all e-Mudhra Agreements, Subscribers, relying Party’s or otherwise required to be entered into for the purposes mentioned herein, must contain clauses for severability, survival, notice and merger clauses for the following purposes:

- **Severability**: While interpreting the clauses of an Agreement, if any clause is found to be severable from the rest of the Agreement, the invalidity of such clause shall not affect the validity of the other clauses in the agreement.
- **Survival**: While interpreting the clauses of an Agreement, certain specific clauses shall be deemed to survive the expiry or termination of the Agreement wherein such clauses are incorporated.
- **Merger**: While interpreting the clauses of an agreement it is deemed that all clauses that require understanding of the relationship between the parties and the purpose thereof are merged or provided in the Agreement.
- **Notice**: The Agreement shall state what all circumstances require a notice to be provided by the Parties and the place and to whom such notices shall be forwarded.

2.4.3 Dispute Resolution Procedures

2.4.3.1 Disputes among e-Mudhra and Customers
Any Dispute based on the contents of this CPS, between e-Mudhra and one of its customers who has availed specific services shall be resolved according to provisions in the applicable agreement between the parties.

2.4.3.2 Disputes with End-User Subscribers or Relying Parties
Any Dispute between e-Mudhra and one of its End user subscriber or relying parties, shall be resolved according to the dispute resolution clause in the respective agreements.

2.4.4 Role of the CCA
The CCA is competent under the IT act, clause 18(1) to resolve any dispute between CAs and Subscribers.

2.5 Fees
The fees for various types of Digital signature certificates will be available on the company’s website at www.e-mudhra.com and will be updated from time to time.

e-Mudhra is entitled to charge subscribers fees for management and issuance of certificates. The current fees for various types of certificates are listed in the website.

e-Mudhra is not currently charging any fees to relying parties or other public for accessing the certificate information from the repository. The certificate search facility is provided free of cost at its website (www.e-Mudhra.com/repository/certs).
e-Mudhra shall update and make available the CRL, free of charge for access by relying parties (www.e-mudhra.com/repository/crl). However any OCSP validation services as well as provision of OCSP services to cater Managed PKI customers or others would be charged based on the specific agreement between the parties.

e-Mudhra will be providing access to policy information documents such as CPS free of charge (www.e-mudhra.com/repository/cps). This is however limited to the specific purpose of viewing. Any reproduction, derivative work creation, modification etc, would be subject to license agreement with e-Mudhra.

The refund policy and other payments terms would be governed as per the terms in the subscriber agreement. In case the application is rejected the full amount would be refunded to the subscriber.

The above terms and fee structure are subject to change at the sole discretion of e-Mudhra.

2.6 Publication And Repository

e-Mudhra shall maintain an online repository of information relevant to the operations of PKI services under e-Mudhra hierarchy on best effort basis. The information in the e-Mudhra repository is subject to change and published periodically and also on need basis.

e-Mudhra shall reserve rights to not to publish any information that e-Mudhra considers as confidential or not to be disclosed due to the sensitivity of the information.

2.6.1 Publication of CA Information
The information published in e-Mudhra repository include:

- e-Mudhra Certification Practice Statement.
- The Digital Signature Certificates issued under e-Mudhra hierarchy.
- The Digital Signature Certificates and public keys of e-Mudhra CA hierarchy.
- The Certification Revocation List of e-Mudhra hierarchy.
- Fees levied for services provided.
- A provision to search for the availability of a given Certificate.

2.6.2 Frequency of Publication
e-Mudhra CPS and the CA certificate under e-Mudhra hierarchy shall be published as soon as they are updated and approved by CCA. The CRL shall be published in the repository once in 7 days with validity of not more than 30 days.

2.6.3 Access Control
The information published in e-Mudhra online repository is publicly accessible information and e-Mudhra provides read only access to the contents of the repository. e-Mudhra has put in place sufficient safeguards, logical and physical, to prevent any unauthorized access or alteration/modification of repository entries.

2.6.4 Repositories
The e-Mudhra online repositories are available at www.e-mudhra.com.
2.7 Compliance Audit
As per the specifications of the IT Act 2000 and its associated rules, regulations and amendments e-Mudhra would be getting compliance audits done. This would be performed by one of the CCA empanelled set of auditors.

In addition to this Managed PKI customer will also undergo a compliance audit to the extent required by IT Act. Apart from this other entities such as RA would also be asked to undergo compliance audit to the extent required by IT Act by a CCA empanelled auditor selected by e-Mudhra.

2.7.1 Frequency of Audit
Compliance audits will be performed on an annual basis. In addition internal audits would be performed on a half-yearly basis.

2.7.2 Identity of Auditor
A CCA empanelled auditor will perform the audit.

2.7.3 Auditors relationship to audited party
The Audit firm would be independent of e-Mudhra and will not have other business dealings with e-Mudhra.

2.7.4 Topics covered by Audit
The scope of audit will be as per IT Act 2000 and its associated rules and regulations and will include physical controls, environmental controls, key management, personnel, security compliance, CPS and its adherence, regulation prescribed by controller and any other items deemed necessary by e-Mudhra and CCA.

2.7.5 Actions taken as result of deficiency
Significant exceptions and non conformance as reported by the auditors will be reviewed by e-Mudhra Policy approval committee. If the exceptions are deemed to provide immediate risk to the security of the system corrective actions will be planned and implemented by e-Mudhra within a reasonable commercially viable time frame. e-Mudhra Policy approval committee will be responsible for remedial planning and implementation of a remedial measure.

2.7.6 Communication of results
Compliance Audit results of e-Mudhra, as per IT Act shall be submitted to CCA. e-Mudhra reserves the right to share the results to other parties as deemed fit.

2.8 Confidentiality And Privacy

2.8.1 Types of Information to be kept Confidential and Private
The following records of Subscribers are kept confidential and private (“Confidential/Private Information”):
- Disclosure of any information pertaining to the digital signature certificate applications, irrespective of the status of such applications, is not permitted. Confidentiality shall also be maintained for any information collected and pertaining
to registration and verification of the Digital Signature Certificate irrespective of whether such information is provided in the Digital Signature Certificate or otherwise.

- Transactional records (both full records and the audit trail of transactions).
- Access to the audit reports and any information that is considered sensitive, shall be provided exclusively to the e-Mudhra authorized trusted personnel and the CCA. The purposes for which such information will be used shall be in accordance with the provisions of applicable laws for the time being in force.
- Audit trail records created and or retained by e-Mudhra or a Customer.
- Contingency planning and disaster recovery plans.
- Security measures controlling the operations of e-Mudhra hardware and software and the administration of Certificate services and designated enrolment services.
- Any other records / data / information mandated to be kept confidential and private by the IT Act 2000, its associated rules and regulations.

2.8.2 Types of information not considered confidential or private

Confidential or Private Information shall not include:

- Information included in the issued Digital signature certificate.
- Information included in the CRL.
- Information that is publicly available at the time of its disclosure; or
- Information that becomes publicly available following disclosure; or
- Information that is already known to or was in the possession of e-Mudhra prior to disclosure under Subscriber Agreement or Relying Party Agreement or;
- Information that is disclosed to e-Mudhra from a third party, which party is not bound by any obligation of confidentiality; or
- Information that is or has been independently developed by e-Mudhra without using the Confidential Information;
- Information that is disclosed with the prior consent of the disclosing party.

2.8.3 Disclosure of Certificate Revocation/Suspension Information

e-Mudhra shall publish list of certificates that are Revoked / Suspended. The reason code of the revoked / suspended certificate shall not be confidential. Any other information related to revocation / suspension shall not be disclosed to anyone other than the subscriber or as required by law.

2.8.4 Release to Law Enforcement Officials

Any Confidential information shall be released by e-Mudhra and its RAs to the courts or Tribunal or law enforcement agencies in accordance with applicable legal requirements.

2.8.5 Release as Part of Civil Discovery

e-Mudhra shall disclose any confidential information in response to Judicial or legal process during any arbitration, litigation or judicial proceedings. In any such disclosure, e-Mudhra shall make reasonable efforts to restrict the disclosure of the information to the extent reasonably required by the proceedings.

2.8.6 Disclosure upon Owner’s Request

Any confidential Information of e-Mudhra DSC Owner shall not be disclosed by e-Mudhra under any circumstances which may warrant liability to any other party, except when such
confidential information is requested by the owner and the same shall be revealed to him upon such owner establishing the proof of his identity to e-Mudhra or when the confidential information are to be disclosed in response to any Legal / regulatory requirement. e-Mudhra shall not be liable for any disclosure made as per the terms above and the owner shall indemnify e-Mudhra on all situations for all losses, costs or damages incurred by e-Mudhra arising in connection with or incidental to such disclosure.

2.8.7 Other Information Release Circumstances
No stipulation.

2.9 Intellectual Property Rights

2.9.1 Property Rights in Certificates and Revocation Information
All Intellectual Property Rights in and to the certificates and revocation information that is issued under e-Mudhra hierarchy, shall be the sole and exclusive property of e-Mudhra. e-Mudhra and customers grant permission to reproduce and distribute certificates as well as use revocation information to perform relying party function on a nonexclusive basis subject to the relying party agreement referenced in the certificate and the applicable agreement.

2.9.2 Property Rights in the CPS
All Intellectual Property Rights in and to this CPS, is recognized by the Participants including Subscribers, relying party, customers, partners, RA and other party belonging to e-Mudhra domain of services, to vest absolutely and irrevocably in the custody of e-Mudhra.

2.9.3 Property Rights in Names
All rights subsisting in any trademark, service mark or trade name as provided for in any certificate application and all distinguished name(s) in the certificate issued to the certificate applicant shall vest with such certificate applicant.

2.9.4 Property Rights in Keys and Key Material
CA and the Subscriber shall retain all rights, including intellectual property rights, in the key Pairs corresponding to the certificate to which they are subject, irrespective of the medium where the key pairs may be stored or protected.
3. IDENTIFICATION AND AUTHENTICATION:

3.1 Initial Registration
The applicant shall submit the application offline along with the supporting documents. The RA shall verify the authenticity of the application submitted.

3.1.1 Types of Names
All names issued by e-Mudhra, in the Digital signature certificates, shall confirm to the X.520 naming conventions. The Digital signature certificates issued by e-Mudhra shall use Distinguished Names (DN) to facilitate the identities to subscribers. Distinguished Name may comprise of the following fields.

- **Common Name (CN):** It is a unique name of the Subscriber as provided in the identity documents for the personal certificates and FQDN (fully qualified domain name) for the server certificate
- **Digital communication address (E):** of the Subscriber.
- **Organization (O):** Name of the organisation
- **Organizational Unit (OU):** to distinguish various organizational groups like department or sub-divisions within the same organization.
- **City or Locality (L):**
- **State or Province (S):** The name of the State / Province of Subscriber’s residential or office address.
- **Country (C):** the country to which the Subscriber belongs.

In addition to the above mentioned fields, e-Mudhra may include more O and OU fields in subscriber certificates to indicate RA name or other details stipulated by CCA.

An example of DN details pertaining to e-Mudhra CAs is listed in following table:

3.1.2 Need for names to be meaningful
The subject distinguished names in a digital signature certificate must be meaningful and must be able to determine the identity of the entity/subject. The common name in a certificate shall refer to the generally accepted personal name for individuals, a fully qualified domain name for devices, legal name of the organization, a unit within an organization, any other name identifying the device or any name legally owned or assigned to the organization.
The organization name (O) attribute type, when present in the subject distinguished name, represents the legal name of the Subscriber organization. Such information provided is for identity purposes only and shall not be construed to constitute any power of attorney or other rights.

3.1.3 Rules for Interpreting Various Name Forms
The names shall be interpreted as specified in the section 3.1.1 and 3.1.2 of this CPS. Uniqueness of an existing name can be enhanced by applying other terms, numbers, characters or letters to it.

3.1.4 Uniqueness of Names
The Distinguished names form the basis for the uniqueness of each assigned name. As specified in the CPS, the same Applicant/Subscriber can have multiple Digital signature certificates of different class or purpose.

The purpose of the Distinguished Name is to uniquely identify the subscriber in public repository in which it is published. In addition to the above, e-Mudhra Digital Signature certificate shall also have a unique serial number which enables identification, suspension, activation and revocation of the certificates issued.

3.1.5 Name Claim Dispute Resolution Procedure
Any disputes and claims arising with regard to names shall be settled by e-Mudhra who shall be the final arbiter of such assigned names in the certificates and its decision shall be conclusive and binding. In addition to above, all certificate applicants are prohibited from using names that infringe on the Intellectual Property Rights of others. The final decision on approval/rejection of names shall lie with e-Mudhra.

3.1.6 Recognition, Authentication, and Role of Trademarks
Any Trademark, upon satisfactory proof of ownership produced to e-Mudhra, shall be reserved by e-Mudhra to its registered owner.

3.1.7 Method to prove possession of private key
The Private key corresponding to the Public Key displayed in the Digital Signature in the hand of the Certificate Subscriber shall be verified by e-Mudhra through the use of digitally signed certificate request pursuant to PKCS#10 or other cryptographically equivalent and any other demonstration approved by e-Mudhra.

3.1.8 Authentication of Organization Identity
The RAs shall be responsible for verifying the identity of the organization which has requested for the organization certificates (Class 2 and 3 organization certificate). On a best effort basis, the RA operating under e-Mudhra shall perform appropriate validation and/or verification based on the information provided in the application form and the supporting documents in order to establish the identity of the organization. To establish the identity, the organization along with the application shall submit proof of ownership of the name, which shall include:
• Company Registration
• Society Registration
• Memorandum of Understanding
• Article of Association
• Documents pertaining to Shops & Establishments Act
• Bank details for a Current Account
• Partnership Deed / Agreement etc
• Any other documents as specified in the CPS.

All necessary proof that the person is duly authorized to obtain certificate on behalf the organization shall also be provided.

In addition for the Managed PKI Customers, e-Mudhra will ensure the existence of the Managed PKI customers as outlined above. For device certificates, in addition the customers will have to submit proof on existence of the servers/ devices and also proof that the organization has authorized the issuance of a secure ID to the devices.

3.1.9 Authentication of the Identity of RAs
The organizations intend to become RAs under e-Mudhra PKI enter into an agreement with e-Mudhra. e-Mudhra authenticates the identity of the prospective RA before final approval of its status as RA. This is also confirmed by requiring the personal appearance of an authorized representative of the organization before authorized personnel of e-Mudhra.

3.1.10 Authentication of Individual Identity
The process of identification of a subscriber shall differ based on the class of certificate that is requested by the subscriber and may include any or all of the following: verification of e-mail, face to face authentication and verification of stipulated documents. An application for a certificate must be made (i) personally by an individual or, (ii) by the duly authorized representative of the organization in the case of Class II and Class III organization certificates.

3.1.10.1 Class 1 Individual
Subscribers to Class 1 certificates are non-verified subscribers (i.e. e-Mudhra does not confirm that the certificate applicant is the person identified in the certificate application). Only limited e-mail/Mobile confirmation will be done for certificate applicants for Class 1. E-mail/Mobile validation, identification and authentication of the individual applicant will be done by checking and verifying that the e-mail/Mobile address of the applicant does in fact exist and the applicant is able to access the information sent through e-mail/Mobile.

3.1.10.2 Class 2 Individual
The identification of the individual applicant will be verified by the RA. The identity is verified against the identification documents (attested / certified photocopies), as listed in section 3.1.10.7 of this CPS. E-mail/Mobile validation, identification and authentication of the individual applicant will be done by checking and verifying that the e-mail/Mobile address of the applicant does in fact exist and the applicant is able to access the information sent through e-mail/Mobile.
3.1.10.3 Class 2 Organization
For identifying organizations, details like registration details, Income Tax records/Annual reports/bank details will be required. The RA will verify the identity of the personnel representing the Organization or Government Organization with the identification document (attested/certified photocopies) as listed in section 3.1.10.7 of this CPS. Identification documents must be government issued identification.
E-mail/Mobile validation, identification and authentication of the individual applicant will be done by checking and verifying that the e-mail/Mobile address of the applicant does in fact exist and the applicant is able to access the information sent through e-mail/Mobile.

The organization is verified against the documents like Income Tax records/Annual reports/bank details submitted by the organization.

3.1.10.4 Class 3 Individual
The identification of the individual applicant will be verified by the RA.
The identity is verified against the identification documents (attested/certified photocopies) as listed in section 3.1.10.7 of this CPS.
E-mail/Mobile validation, identification and authentication of the individual applicant will be done by checking and verifying that the e-mail/Mobile address of the applicant does in fact exist and the applicant is able to access the information sent through e-mail/Mobile.

3.1.10.5 Class 3 Organization
For identifying organizations, details like registration of company, Income Tax records/Annual reports/bank details will be required. Additionally an authorization letter from the organization would be required, authorizing the individual to obtain certificate on behalf of the organization.

RA will verify the identity of the personnel representing the Organization or Government Organization applicant with the identification document (attested/certified photocopies).
Identification document must be government issued identification.

The organization is verified against the documents like Income Tax records/Annual reports/bank details submitted by the organization.
E-mail/Mobile validation, identification and authentication of the individual applicant will be done by checking and verifying that the e-mail/Mobile address of the applicant does in fact exist and the applicant is able to access the information sent through e-mail/Mobile.
The identity of organization/individual willing to become RA also will be verified as per this procedure by e-Mudhra.

3.1.10.6 Class 3 Device
Fully qualified domain name (FQDN) ownership shall be verified based on documentary proof submitted by the company from the relevant Registrar of Domains. Domain name (FQDN) is validated using Nslookup/Whois queries.

The applicant organization is verified by the documentary proof submitted as per Class 3 organization document requirements mentioned in section 3.1.10.7 of this CPS.
Applicant / authority is contacted vide any of the mediums like phone, mobile, email, SMS, postal mail to validate the ssl certificate request, company, authorized personnel.

Additional identification in the form of Authorization letter from the company, authorizing the individual to obtain a certificate will be required, where, the certificate is intended to be used for Web form signing, User authentication, Code signing, VPN client purposes or for securing servers and VPN devices.

Similarly for Class III certificates for VPN devices, the proof of ownership of the VPN device shall be obtained from the certificate applicant.

3.1.10.7 Verification documents required
The verification documents required for each class of digital signature certificate are available at [www.e-mudhra.com/repository/validationdocuments](http://www.e-mudhra.com/repository/validationdocuments).

| **(Attested / Certified)**                             |
| 1. Copy of Telephone Bill.                             |
| 2. Copy of Electricity Bill.                           |
| 3. Copy of Water Bill.                                 |
| 4. Copy of Gas connection.                             |
| 5. Copy of Bank Statements signed by the bank.         |
| 6. Copy of Service Tax/VAT Tax/Sales Tax registration certificate. |
| 7. Copy of Driving License/RC                          |
| 8. Copy of Voter ID Card                               |
| 9. Copy of Passport.                                   |

With the above document that the following condition will apply.

1. **Validity of the Address Proof** : In case of any utility bills like electricity, water, gas, and telephone bill, the recent proof, but not earlier than 3 months from the date of application should be attached.
2. Using single document copy to be used for both identity & address proof: This may be considered. However, if the address in the Photoid is different from the Address given in the application then a separate Address proof may be insisted & collected.

3. Attestation of Copy: Gazetted officers, OR Bank Manager OR Post Master. Otherwise the RA may verify the copy of the identity and address proof against the original documents and certify the copy stating that “has been verified against the originals”. Such a copy should be signed by the authorised person of the RA and should bear the name and address of the signatory.

a. Attested photocopy of documents such as:
   • ID Card having Employee Identification No. or any other supporting documents.
   
b. Authorization Letter in favor of the certificate applicant from the Govt organization (as per the format attached with the application form)
   
c. Latest photograph of the applicant.
   
d. Verification of physical presence.
   
For Class 3 certificates, identity shall be established by in-person proofing before the RA, to confirm identities; information provided shall be verified to ensure legitimacy. A trust relationship between the RA and the applicant which is based on an in-person antecedent may suffice as meeting the in-person identity proofing requirement.

3.2 Rekey And Renewal Process

For Class 1 Individual, Class 2 Individual, Class 2 Organization, Class 3 Individual, Class 3 Organization and Class 3 Device certificates the procedure of Rekey will be followed. The subscriber should apply for renewal at least 15 days prior to expiration of his existing certificate. A new key pair has to be generated and a new certificate is issued against the request. The existing subscriber can use a challenge phrase to send in a request for rekey.

3.3 Rekey After Revocation

1. Once a Digital Signature Certificate is revoked by e-Mudhra, irrespective of the reasons, it shall not be renewed by e-Mudhra.

2. Any subscriber who wishes to resubscribe to use the Digital Signature Certificate issued by e-Mudhra, has to complete the registration process, afresh as outlined in this CPS.

3.4 Revocation Request

e-Mudhra shall verify, whether the request for revocation of a certificate, is validly raised by the subscriber or the RA who approved the subscriber’s application for certificate, before revoking a certificate. In addition, the procedures for authenticating a request for revocation include one or more of the following:

- If applicable, having the subscriber submit the challenge question (As part of the certificate application process, subscribers optionally choose and submit a challenge phrase with their enrollment information), and revoking the certificate if it matches the challenge phrase on record,
- Receiving a message proposed to be from a Subscriber who requested for revocation, inclusive of the Digital Signature of the certificate to be revoked for reference, and
- Online request from Subscriber. The Subscriber submits an online revocation request, or the Subscriber sends a revocation request message that is not digitally signed with reference to the certificate to be revoked.

In these cases, e-Mudhra confirms the revocation request by sending an electronic communication to the certificate subscriber (to the electronic communication contact details listed in the certificate to be revoked) and requests the subscriber to respond confirming the revocation. e-Mudhra revokes the certificate only after receiving the confirmation from the subscriber.
e-Mudhra RA and the Managed PKI clients shall have the right to authenticate for revocation of any Subscriber certificate whose applications are authenticated by them, using their access control rights given to them through their certificate.

e-Mudhra may revoke the certificates based on the online request without digital signature from the subscriber login that is made available for the subscriber.

4. OPERATIONAL REQUIREMENTS

4.1 Certificate Application
The initial registration process shall include the submission of application by offline mode by the applicant for issuing Digital signature certificate along with the supporting documents. Any such application shall be verified / validated by the RA, with whom the application is submitted.

4.1.1 Certificate Applications for End-User Subscriber Certificates
Any end-user certificate applicant requesting for e-Mudhra certificate, needs to go through the registration process consisting of:

• Completing and submitting Application form for certificate along with required information/documents
• Generating or requesting for generation a key-pair
• Delivering his/her, or its public key, directly or through an RA, to e-Mudhra
• Demonstrating to e-Mudhra that the certificate Applicant has possession of the Private Key corresponding to the public key sent to e-Mudhra
• Giving consent to the Subscriber Agreement of e-Mudhra, in force at that time

Applications so submitted to RA/e-Mudhra/Managed PKI Customer may be approved or rejected. In case of approval, the issuance of the certificate will be done by one of the Sub CA in e-Mudhra PKI hierarchy.

4.1.2 Certificate Application for Sub CA and RA Certificates
e-Mudhra does not require RA or Managed PKI Customers to complete formal certificate applications. Instead, they enter into a contract with e-Mudhra. RA and Managed PKI customer applicants provide their credentials as required demonstrating their identity. All Sub-CAs, RA and Managed PKI customer certificate requests are created and approved by authorized e-Mudhra personnel through a controlled process that requires the participation of multiple trusted individuals. In addition e-Mudhra CAs certificates requests are also created and approved by authorized e-Mudhra personnel.

4.2 Certificate Issuance

4.2.1 Issuance of End-User Subscriber Certificates
On receipt of a completed application, the RA shall validate or reject the information. After thorough verification of all required information/authentication procedures, based on different class of certificates, if such information is found to be complete and correct, the RA approves the certificate application and if found otherwise the RA can reject the certificate application. On receipt of RAs request or on approval of certificate application, a certificate is created and issued by e-Mudhra based on the information in the certificate application.
When a Managed PKI Customer approves a certificate application and communicates the approval to e-Mudhra, certificate is issued to the certificate applicant. The procedures of this section is used for a request to replace including renewal or rekey of a certificate application.

### 4.2.2 Issuance of Sub CA, RA and Managed PKI Certificates

The identities of entities wishing to become RA or Managed PKI Customers of e-Mudhra are authenticated by e-Mudhra. The certificates are issued to perform the RA or MPKI customer services on successful validation by e-Mudhra. Sub-CA requests will be created by authorized e-Mudhra personnel. e-Mudhra shall enter into a contract with such customer applicant or RA applicant after confirming their identity based on the credentials submitted. The execution of such a contract indicates the complete and final approval of the application by e-Mudhra. The decision to approve or reject customer application is solely at the discretion of e-Mudhra. Following such approval, e-Mudhra issues the certificate to the RA. It is to be noted that all certificate requests are validated through a controlled process by authorized e-Mudhra personnel with the aid of multiple trusted persons.

### 4.3 Certificate Acceptance

A notification is sent to subscriber that the certificate is ready to be downloaded. Along with this notification, a separate PIN or authentication number to download certificate is sent to subscriber. Certificates are made available to subscribers by allowing them to download them from e-Mudhra web site for a period of 15 days and no charge will be levied in case of a problem during this period. Downloading the certificate constitutes the subscriber’s acceptance of the certificate. In case there is a failure during the download process and the certificates are not sent by the CA server, the subscriber will be allowed to download again. In case the subscriber claims that he has not been able to download the certificate though the server has sent it, the subscriber will have to send in a new certificate application request and the old certificate will be revoked. The charges will be at the discretion of e-Mudhra.

### 4.4 Certificate Suspension And Revocation

#### 4.4.1 Circumstances for Revocation

**4.4.1.1 Circumstances for Revocation of Subscriber Certificate**

e-Mudhra shall revoke a subscriber certificate provided:

- The RA approving the subscriber’s certificate application has reason to believe that
  - There has been a compromise of the subscriber’s private key.
  - The certificate was issued in a manner not materially in accordance with the procedures required by this CPS.
  - The subscriber’s data in the certificate is suspected to be inaccurate or belonging to a third party.
  - The information provided by applicant in the certificate application is false or untrue.
- The RA who approved the Subscriber’s application for CERTIFICATE, finds out that one/some of the pre-requisites for CERTIFICATE issuance was not complied with properly or done inadequately, and / or;
• In case of organizational certificates, the subscriber’s organization name or constitution changes or the relationship between the organization and the representative to whom the certificate was issued has ceased to exist and / or;
• The subscriber has breached materially an obligation or representation or warranty as per the Subscriber Agreement of e-Mudhra, in force at that time, and / or;
• The subscriber/e-Mudhra prefers to disagree on one or some or all the points of Subscriber Agreement with the subscriber, and expresses his/its intention to terminate the Subscriber Agreement and / or;
• The subscriber requests revocation of the certificate and / or;
• To comply with any judicial/ law enforcement proceedings.

4.4.1.2 Circumstances for Revocation of Sub-CA or RA Certificates

e-Mudhra revokes a Sub-CA or RA Certificate if:

• It has sufficient information or reason to believe that the Private Key of the Sub-CA or RA is compromised.
• On termination of the agreement between e-Mudhra and the Sub-CA or RA.
• It has sufficient information or reason to believe that the certificate was not issued in conformity with the procedures laid out in this CPS.
• It has sufficient information or reason to believe that the certificate was issued to some entity other than the one named as Subject in the certificate or Certificate was issued without proper authorization from the entity named as Subject in the certificate.
• It has reason to believe that some material pre-requisite for certificate issuance was not satisfied fully or partially.
• The MPKI customer or RA requests revocation of the certificate.
• The Managed PKI customer organization has ceased to exist.
• The termination of agreement between CA and the Managed PKI customer.

4.4.2 Who Can Request Revocation

4.4.2.1 Who Can Request Revocation of Subscriber Certificate

e-Mudhra shall accept revocation requests from:

• The subscriber of the Certificate or his/her legal heir in case the Subscriber has expired
• The authorized personnel or representative of the organisation
• The RA that approved or processed the subscriber’s certificate application request.
• The authorized personnel of an MPKI customer.

4.4.2.2 Who Can Request Revocation of a Sub-CA or RA Certificate

Revocation requests for e-MudhraSubCA, RA, e-Mudhra Customers and Managed PKI customer’s certificates could be initiated by the concerned owner, entity, an authorized agent/entity or the legal heirs of the owner. e-Mudhra could initiate the revocation / request on its own for the above mentioned entities.
4.4.3 Procedure for Revocation Request

4.4.3.1 Procedure for Revocation Request of Subscriber Certificate
An entity requesting for revocation shall be a Subscriber or duly authorized representative, as applicable. Any such request is to be communicated to e-Mudhra or the RA that was involved in the issuance process.

The request will be online through a challenge phrase or in an offline mode through signed revocation request. On receipt of a valid revocation request, e-Mudhra on a best effort basis, will immediately revoke the certificate and notify the subscriber about the certificate revocation. For offline revocation requests, the requests will be processed on the next working day. The updation and publishing the CRL will be done as detailed in this CPS.

4.4.3.2 Procedure for Revocation Request of a Sub-CA or RA Certificate
A RA requesting revocation for RA certificate or authorized e-Mudhra personnel requesting revocation for Sub-CA certificate is required to communicate the request to e-Mudhra. Upon receiving a valid revocation request e-Mudhra will promptly revoke that certificate and notify the requester about the successful revocation. In case of the revocation of a Sub-CA, e-Mudhra will also notify the concerned RAs about the Sub-CA revocation.

4.4.4 Revocation Request Grace Period
Revocation requests are to be verified on receipt and action should be taken as detailed in the section 4.4.3.1 of this CPS

4.4.5 Circumstances for Suspension
e-Mudhra does not offer suspension services for sub-CA or subscriber certificates.

4.4.6 Who can Request Suspension
Not Applicable.

4.4.7 Procedure For Suspension Request
Not Applicable.

4.4.8 Limits On Suspension Period
Not Applicable.

4.4.9 CRL Issuance Frequency
e-Mudhra shall publish CRL’s containing information on the revocation of certificates and shall also offer services to enable status check through its repository.
e-Mudhra updates and publishes the CRLs for subscriber Certificates at least once every week, even if no changes to the CRLs have been made.
e-Mudhra shall place a mechanism wherein expired certificates are removed from the CRL’s in 30 days after the certificate’s expiry date.

4.4.10 Certificate Revocation List Checking Requirements
Relying parties must verify the validity of a certificate against the recent/latest CRL that is published in the e-Mudhra repository to rely on the subject certificate.
The CRLs will be available in e-Mudhra’s repository [www.e-mudhra.com/repository/crl](http://www.e-mudhra.com/repository/crl).

### 4.4.11 On-Line Revocation/Status Checking Availability

In addition to publishing the CRL, e-Mudhra will also provide a web query mechanism to check the status of Certificates in the repository. In addition e-Mudhra will also provide OCSP service to relying parties who require such services. This will be a charged service and the exact mode will be communicated with the relying parties.

### 4.4.12 On-Line Revocation Checking Requirements

In case a relying party does not check certificate status using CRL, they will have to adopt one of the checking mechanisms mentioned in section 4.4.11.

### 4.4.13 Other Forms of Revocation Advertisements Available

No stipulation.

### 4.4.14 Special Requirements Regarding Key Compromise

In case there has been a key compromise of any e-Mudhra CA, e-Mudhra will make additional reasonable efforts to notify the relying parties.

### 4.5 Security Audit Procedures

#### 4.5.1 Types of Events Recorded

e-Mudhra shall log the following significant events either manually or automatically:

- CA Life cycle management events, including key generation, storage, archival, backup, recovery, and destruction of:
  - CA key
  - Cryptographic devices

- CA and Subscriber Certificate life cycle management events including registration, generation, issuance, revocation and publication of:
  - CA certificate
  - Sub-CA certificate
  - RA certificate
  - Subscriber Certificate
  - Issuance of CRL.

- Events including but not limited to Security such as:
  - PKI system access
  - PKI system security actions
  - Read-Write-Deletion records of Sensitive data/files.
  - Personnel changes
  - System crashes, hardware failures and other anomalies
  - Firewall and router activity
  - Physical Access
Log entries should include the following parameters:

- Date and time of the event
- Identity of the entity causing the event

### 4.5.2 Frequency of Processing Log

System Audit logs will be examined for key security and operational events on a daily basis.

The processing of audit logs includes a review of the audit logs and recording of significant events in an audit log summary. e-Mudhra personnel shall verify that the log has not been tampered with, conduct brief inspection all log entries, and investigate thoroughly in case of any irregularities in the logs. Actions taken based on audit log reviews will be documented.

### 4.5.3 Retention Period for Audit Log

Audit logs are retained onsite at least twelve months after processing and thereafter archived.

### 4.5.4 Protection of Audit Log

Only authorized e-Mudhra personnel have access to view and process audit log files. Audit logs are protected from unauthorized viewing, modification, deletion, or other tampering through the use of any or all of various access control mechanisms.

### 4.5.5 Audit Log Backup Procedures

Backup of audit logs on physical removable media are created periodically and protected from use by unauthorized personnel. In addition, audit logs and audit summaries are backed up or copied if in manual form in a safe storage area.

### 4.5.6 Audit Collection System

Audit data is collected in a combination of automated and manual process and is protected from any unauthorized access, viewing, modification, deletion or tampering.

### 4.5.7 Notification to Event-Causing Subject

No notice is required to be served/given to the individual, organization, device, or application that caused any event, which is logged by the audit collection system.

### 4.5.8 Vulnerability Assessments

Events from Audit logs are captured and are monitored for possible vulnerabilities. Based on results of monitoring activity vulnerability assessment is carried out. The results are reviewed. The monitoring activities are revised based on review.

### 4.6 Records Archival

#### 4.6.1 Types of Events Recorded

e-Mudhra retains an archive of information and actions that are material to each certificate application and to the creation, Issuance, revocation, expiration, and renewal of each certificate issued by e-Mudhra. These records include all relevant evidence regarding:

- Subscribers’ identity and other facts as provided in the certificate and the necessary documentary evidence in support of the certificate application, and
• Those material facts, apart from information required for audit compliance, that may be foreseen
• Records are kept in the form of either digital-based messages or paper-based documents. It is ensured that the indexing, storage, preservation, and reproduction of records are accurate and complete.

4.6.2 Retention Period for Archive
Records associated with certificates will be archived for a period of 7 years.

4.6.3 Protection of Archive
All archive records of e-Mudhra are adequately protected against unauthorized access, view, alterations and tampering and are accessible exclusively by authorized personnel. All systems and media required to process and store the archive records are maintained in accordance with the provisions of the IT Act.

4.6.4 Archive Backup Procedures
Backup copies for all archives are created on a regular basis and an offsite disaster recovery and warehouse facility is made available for storage of such copies including paper based records.

4.6.5 Requirements for Time-Stamping Of Records
All significant records including Certificates, CRLs, and other revocation database entries contain time and date information.

4.6.6 Archive Collection System
Archives are handled by trusted & authorized personnel of e-Mudhra.

4.6.7 Procedures to Obtain and Verify Archive Information
Access to archive records shall be granted, exclusively to, e-Mudhra trusted personnel and CCA on request.

4.7 Key Changeover
Changeover of Keys of e-Mudhra CA, RAs and Subscribers shall be carried out as stipulated by the IT Act and in accordance with this CPS. e-Mudhra shall give adequate notice in case of any change in key pair of e-Mudhra CA, as used for signing Certificates issued under e-Mudhra hierarchy, to the subscribers, RAs & relying parties. Subscriber’s keys will not be changed in the case of a compromise.

On or before expiry of an existing certificate, the subscribers shall generate a new key pair and submit the public key along with the new application for issuance of a new Certificate.

4.8 Disaster Recovery And Key Compromise
e-Mudhra maintains off-site backups of data and information as required by IT Act. Backup of CA and Sub-CA private keys are generated and maintained and will be made available in the event of disaster. e-Mudhra maintains a Disaster Recovery center as per the requirements of guidelines of IT Act, which will be able to handle Issuance and revocation of certificates and publishing of CRL and certification validation services.
In the event of e-Mudhra key compromise, the key management and operations personnel of e-Mudhra including the security, cryptographic operations, administration and management representatives will act as per the incident management and disaster recovery plan which has been approved by e-Mudhra Policy approval committee.

4.9 CA Termination

e-Mudhra reserves the right to terminate any Sub CA at its policy based discretion. In case of termination of a Sub-CA (including Managed PKI), or e-Mudhra CA, e-Mudhra will create and publish a termination plan that reasonably minimizes disruption to customers, subscribers, and relying parties. The termination plan covers issues including but not limited to:

- Providing notice to subscribers, relying Parties with which e-Mudhra has established contacts, customers, and the CCA who may be affected by such a termination.
- Following duly, the maintenance protocols of the archives, as provided under this CPS and the Act.
- Providing Customer services, revocation service & publishing of CRLs.
- Compensation for any certificates revoked under the termination plan (if found necessary) or assisting issuance of new certificate in lieu of the revoked certificate from another CA. In any case, such compensation shall not exceed the amount paid to e-Mudhra CA by the certificate holder in respect of the subject certificate.
- The procedure / process of destructing private keys of the CA and/or the Sub CA.
- Provisions needed for the transition of services to a successor Sub-CA.

4.10 Cross Certification

e-Mudhra CA is licensed by CCA India and the public key of e-Mudhra is signed by RCAI established by CCA.
5. PHYSICAL, PROCEDURAL, AND PERSONNEL SECURITY CONTROLS

5.1 Physical Controls

5.1.1 Site Location and Construction

e-Mudhra shall operate their systems in a physically secured place to prevent any unauthorized handling of sensitive data. The physical security standards are modeled as per the physical and operational security guidelines mentioned in the Information Technology Act, 2000 Rules (Schedule II).

e-Mudhra primary site consists of seven physical tiers with security and physical controls in accordance with IT Act.

5.1.2. Physical Access

e-Mudhra operation premises including sensitive areas inside the premises shall be actively monitored. Physical security is enforced in the facility by establishing multiple tiers and putting in place a set of controls through implementation of policies administrative procedures, use of bio metric systems, access cards etc., Access to the site is restricted to trusted personnel on need basis and the same is logged. Persons visiting the data centre shall be escorted by trusted personnel after due permissions and the same is recorded by use of DVR’s and the access registers.

e-Mudhra has put systems and procedures in place to ensure continuous monitoring on 24X7 basis.

5.1.3. Power and Air Conditioning

Primary and backup power systems / sources are available for providing uninterrupted power supply to the e-Mudhra’s operational facility. Temperature and relative humidity(RH) is monitored and controlled on a regular basis by using the HVAC equipments.

5.1.4. Water Exposures

e-Mudhra has put in place sufficient, reasonable measures to ensure that the facility is protected against water exposure like floods etc.

5.1.5 Fire Prevention and Protection

e-Mudhra facility is equipped to prevent and extinguish fires. Appropriate equipments have also been implemented to minimize the damage due to smoke and fire exposure. The measures implemented are designed to meet various provisions of fire safety regulations applicable in India.

5.1.6 Media Storage

e-Mudhra CA data and information as required by IT act are backed up and stored within primary site or secure offsite locations. The access to such location is controlled through various access control mechanism, procedures and is limited to e-Mudhra authorized personnel.
5.1.7. Waste Disposal
Paper documents and materials as found unusable shall be disposed. e-Mudhra shall dispose various materials using appropriate equipment or mechanism or as per manufacturer’s guidelines. e-Mudhra has policies and procedures in place to dispose media based on sensitivity of information in the media to be destroyed.

5.1.8. Off-Site Backup
All critical data shall be backed up periodically and such backup copies shall be stored securely at an offsite location as identified by e-Mudhra.

5.2 Procedural Controls

5.2.1 Trusted Roles
The trusted roles pertain to roles, performed by e-Mudhra personnel handling the following functions, but not limited to:

- validating information in applications
- accepting, rejecting, or other processing of applications, revocation requests, or renewal requests, or enrollment information
- issuance, or revocation of certificates,
- accessing restricted portions of e-Mudhra’s repository
- Handling of subscriber information or requests.

Trusted Persons include, but are not limited to:

- PKI business operations personnel
- System administration personnel including systems, Database, cryptographic administrators
- Personnel that are assigned to perform roles for managing the infrastructure.

The details of trusted personnel is provided under Trusted Personnel List document

5.2.2 Number of Persons Required Per Task
e-Mudhra shall employ appropriate procedures and practices in identifying the number of persons required for handling sensitive functions in order to protect the integrity of CA activities. Where required, e-Mudhra shall implement m out of n control to handle certain sensitive functions.

5.2.3 Identification and Authentication for Each Role
e-Mudhra shall verify the identity of personnel seeking to become trusted personnel by conducting a background check as per the procedure. Additionally e-Mudhra shall request the personnel to appear physically before an authorized personnel or check the identity through a government issued identification. e-Mudhra ensures that a trusted person achieves trusted status to access the facility or to obtain logical access to perform the activity in e-Mudhra systems.
5.3 Personnel Controls

5.3.1 Background, Qualifications, Experience, and Clearance Requirements

e-Mudhra has policies and procedures in place to identify trusted personnel. Such persons shall be required to possess necessary technical and professional competence to discharge their job responsibilities and are required to provide proof of qualification and experience. Trusted personnel shall be subjected to background check at least once every 5 years.

5.3.2 Background Check Procedures

Background checks are performed for trusted personnel as per approved procedures that include, but not limited to:

- Previous employment history,
- Search of Police records,
- Education verification
- Reference check.

e-Mudhra shall avail the services of a private agency or government agency to conduct such background check.

The factors like

- Misrepresentations made
- Highly unfavorable or unreliable personal references and
- Certain criminal convictions etc.,

revealed in a background check or otherwise, may be considered as valid reasons for rejecting a person’s candidature for becoming Trusted Personnel or even for removal of an existing trusted personnel. e-Mudhra HR policy shall form the basis of such actions.

5.3.3 Training Requirements

e-Mudhra shall ensure that well qualified and trained personnel are appointed for the trusted role to perform the job satisfactorily. Any such personnel is provided training in the IT Act and its IT Security policy, e-Mudhra policies, procedures and processes.

e-Mudhra may provide relevant technical training to their personnel to perform their role. The adequacy of such training will be determined by e-Mudhra from time to time.

5.3.4 Retraining Frequency and Requirements

e-Mudhra provides periodic security awareness and any new technology changes training on an ongoing basis based on the newer versions or releases of the products. The frequency of such training will be determined by e-Mudhra from time to time.

5.3.5 Job Rotation Frequency and Sequence

Not stipulated.

5.3.6 Sanctions for Unauthorized Actions

Any violations or unauthorized actions of e-Mudhra policies and procedures will invite e-Mudhra disciplinary actions. Such Disciplinary actions may include without limitation termination of employment.
5.3.7 Contracting Personnel Requirements
Independent contractors and consultants are permitted access to e-Mudhra secure facilities only to the extent they are escorted and directly supervised by trusted persons.

5.3.8 Documentation Supplied to Personnel
All the personnel involved in e-Mudhra services shall be required to read this CPS and other policy documents.

Relevant documents required to perform the roles are provided to personnel. Such relevancy will be determined by e-Mudhra based on the role performed by the personnel.

e-Mudhra shall make available to the personnel the Digital Signature Certificate policies it supports, its Certification Practice Statement, Information Technology Security Policy and any specific statutes, policies or contracts relevant to their position.
6. TECHNICAL SECURITY CONTROLS

6.1 Key Pair Generation And Installation

e-Mudhra CA key pairs will be generated by multiple trained and trusted personnel in pre-planned key generation ceremonies as per the guidelines laid down in the Key Ceremony Handbook, Key Management Tool user’s guide and security policy. This procedure will be documented, recorded and signed by all the individuals entrusted with this activity and will be stored for audit requirements for a period of time deemed appropriate by e-Mudhra Policy approval committee. Key pairs for e-Mudhra CAs is generated in a hardware security module (HSM) certified to meet the requirements of FIPS 140-1 level 3 or higher.

The Managed PKI customers and RA key pair will be generated in smart card/hardware token which follows FIPS 140-1 level 2 or higher.

Key pair generated by Subscribers shall be of a minimum 2048 bit key length. Any such key generation should preferably be on a FIPS 140-1/2 level 1 validated cryptographic module. Key usage shall be restricted by implementing appropriate parameters in extensions.

6.1.1 Private Key Delivery to Entity

Generally the end subscriber private key will be generated by the end subscriber and hence there will be no delivery to the end subscribers. In the case of hardware based tokens or smart cards, pre-formatted tokens will be sent to the subscribers and the associated PIN will be sent by an out of band process. The end user will then use the token and the client software provided to him to generate and store the private key and also initiate an online session with the CA server for certificate generation.

6.1.2 Public Key Delivery to Certificate Issuer

End user subscribers and RA will generate a PKCS#10 requests containing their public key and send it to the CA server. This will be accomplished using the client software which will initiate an online session with the CA server and deliver the signed certificates to the subscriber. The online session will be secured by SSL.

6.1.3 CA Public Key Delivery to Users

e-Mudhra makes its CA Public Keys Certificates available to relying parties in repository available at www.e-Mudhra.com/repository/cacerts.

6.1.4 Key Sizes

The key length of e-Mudhra CAs (including Sub-CAs) shall be equivalent to 2048-bit RSA key pair. The key pairs used by RA and Subscribers shall be of 2048 bit key length.

6.1.5 Public Key Parameters Generation

Not stipulated.

6.1.6 Parameter Quality Checking

Not stipulated.
6.1.7 Hardware/Software Key Generation

e-Mudhra CA generates key pairs in FIPS 140-1 Level 3 compliant hardware security modules.

6.1.8 Key Usage Purposes

e-Mudhra, can at its discretion, using the Key Usage extension in its certificate, restrict the purposes for key usage. (Refer section 7.1.2 of this CPS).

6.2 Private Key Protection

e-Mudhra has put into practice a combination of physical, logical and procedural controls to ensure the security of private keys. Logical and procedural controls are described in this section. Physical access controls are described in section 5.1 of this CPS.

6.2.1 Standards for Cryptographic Modules

e-Mudhra performs all cryptographic operations with its own CA/Sub-CA private keys and client Sub-CA private keys on hardware cryptographic modules rated at a minimum of FIPS 140-1 level 3.

All RAs perform cryptographic operations with their own private keys on hardware cryptographic modules. To protect his private key, a Subscriber can opt for a FIPS 140-1/2 level 1 validated cryptographic module.

6.2.2 Private Key (N out of M) Multi-Person Control

e-Mudhra has implemented multi-person control to protect the activation data needed to activate CA/Sub-CA private keys within e-Mudhra PKI. e-Mudhra segregates the private key or activation data needed to operate the private key into separate parts called “Secret Shares”. Each ‘secret share’ is held by a distinct e-Mudhra trusted personnel referred to as the Custodian. A threshold number of secret shares (n) out of the total number of secret shares (m) are required to operate the private key. Such Secret sharing methodology is applied even in case of e-Mudhra to protect the data needed to activate private keys of e-Mudhra's disaster recovery site.

6.2.3 Private Key Escrow

e-Mudhra will only escrow Subscriber’s encryption private keys. The procedures as approved by CCA will be in place for escrowing subscriber private keys.

6.2.4 Private Key Backup

e-Mudhra creates backup of CA private keys. These are stored in encrypted form in a hardware cryptographic module.

6.2.5 Private Key Archival

At the end of the validity period, CA private key will be deleted and will not be archived. These keys will be destroyed as per requirements specified in section 6.2.9 of this CPS.
6.2.6 Private Key Entry into Cryptographic Module
CA key pairs of e-Mudhra are generated on the hardware cryptographic modules in which the keys will be used. e-Mudhra ensures a copy of such key pairs for disaster recovery purposes. All such copies are transferred in an encrypted form.

6.2.7 Method of Activating Private Key
In case of e-Mudhra CAs, activation of private key shall require m out of n secret shares as mentioned in section 6.2.2 and will be from the cryptographic hardware device that follows FIPS 140-1 level 3 standards.

In case of RA and subscriber, private keys are activated by the client application either by a PIN or password.

6.2.8 Method of Deactivating Private Key
- Process of deactivation for different type of private keys include the following;
- CA's private key: Removal of keys from cryptographic module
- RA's private key: Removal of card from the card reader/tokens from the system or system log off.
- Subscriber's private key: removal of smartcard from the reader/token from the system if the subscriber has opted for hard token mechanism. If soft token is being used then by logging off from the system. It can also be deactivated at the end of each operation. In any case it shall be the primary responsibility of the subscriber to protect the private key.

6.2.9 Method of Destroying Private Key
At the conclusion of an e-Mudhra CAs' operational lifetime, the private keys are securely destroyed. This procedure as established in e-Mudhra operation procedures involves multiple trusted personnel of e-Mudhra.

e-Mudhra shall endeavour to destroy the CA private keys in a manner which ensures that the destroyed key cannot be reconstructed.

Zeroization function is employed in ensuring proper destruction of private keys of e-Mudhra CA. Procedures are also put in place to log such events. e-Mudhra may adopt and perform different methods to destroy its private keys based on the advancement of the technology.

6.3 Other Aspects Of Key Pair Management

6.3.1. Public Key Archival
All certificate containing public keys (including e-Mudhra CAs RAs and Subscribers) are archived upon expiry as part of e-Mudhra’s routine backup procedures and kept for a period of seven (7) years as per IT Act.
6.3.2. Usage Periods for the Public and Private Keys
The expiry date of e-Mudhra CA certificate will be as provided by CCA. e-Mudhra may consider stopping issuance of new certificates at a suitable date prior to the expiration of its certificate under e-Mudhra hierarchy so that no certificate issued by a sub CA in the hierarchy expires after the expiration of the corresponding parent CA certificate.

<th>Validity</th>
</tr>
</thead>
<tbody>
<tr>
<td>All certificates issued including RA, Subscriber</td>
<td>One year or 2 years based on the requirement of applicant.</td>
</tr>
</tbody>
</table>

6.4 Activation Data

6.4.1. Activation Data Generation and Installation
After personalization or initialization of HSM/Smart card/token, no activation data other than access control mechanisms (PIN) are required to operate cryptographic modules.

6.4.2. Activation Data Protection
Passwords or PIN shall not be accessible to anyone except the authorized personnel or certificate holder.

6.5 Computer Security Controls

6.5.1 Specific Computer Security Technical Requirements
e-Mudhra ensures that the systems maintaining CA software and data files are trustworthy systems secure from unauthorized access. In addition, e-Mudhra limits access to production servers to those individuals with a valid business reason for such access. e-Mudhra production network is logically separated from other components. e-Mudhra uses firewalls to protect the production network from any internal and external intrusion. Direct access to databases supporting e-Mudhra repository is limited to trusted persons in e-Mudhra operations group having a valid business reason for such access.

6.5.2 Computer security rating
No stipulation

6.6 Life Cycle Technical Controls

6.6.1 System Development Controls
e-Mudhra develops implements and maintains Applications, as per its System Development and Change Management Standards.

6.6.2 Security Management Controls
e-Mudhra, ensures that the CA systems are controlled and monitored via its established mechanisms and controls. The integrity of the CA systems/software and configurations is verified, by comparing the hash values generated. e-Mudhra validates the integrity of the CA
systems, during installation and thereafter periodically. Such periodicity will be defined by e-
Mudhra as required.

6.6.3 Life Cycle Security Ratings
No stipulation

6.7 Network Security Controls
e-Mudhra shall comply with its approved procedures and protocols while performing its CA
and RA functions using secured network channels to ensure authorized access. All
communication of sensitive information, shall be secured by e-Mudhra, through encryption
techniques and digital signatures.

6.8 Cryptographic Module Engineering Controls
e-Mudhra shall utilize hardware cryptographic modules rated FIPS 140-2 Level 3 (for our
netHSM) to perform all digital signing operations. All cryptographic module engineering
threats are assessed and addressed.
7. CERTIFICATE AND CRL PROFILE

7.1 Certificate Profile
e-Mudhra Certificates complies with:

At a minimum, e-Mudhra X.509 Certificates contain the basic X.509 Version 1 fields and indicated prescribed values or value constraints

<table>
<thead>
<tr>
<th>BASIC FIELD</th>

7.1.3 Algorithm Object Identifiers

e-Mudhra issued certificates are signed using sha2With RSA Encryption algorithm.

7.1.4 Name Forms

e-Mudhra issued certificates are populated with an issuer and subject distinguished name.

7.1.5 Name Constraints

No Stipulation.

7.1.6. Certificate Policy Object Identifier

No stipulation.

7.1.7 Usage of Policy Constraints Extension

No stipulation.

7.1.8. Policy Qualifiers Syntax and Semantics

e-Mudhra populates all certificates with a CPS pointer policy qualifier with corresponding OID having a value pointing to the URL of e-Mudhra CPS.

7.1.9 Processing Semantics for the Critical Certificate Policy Extension

No stipulation.
7.2 CRL Profile

e-Mudhra CAs issue CRLs that confirm to RFC 2459.

<table>

7.2.1. Version Number(s) Supported
All e-Mudhra CRLs are X.509 version 2 CRLs

7.2.2 CRL AND CRL Entry Extensions
No stipulation.
8. SPECIFICATION ADMINISTRATION

8.1 Specification Change Procedures
Amendments to this CPS shall be made by e-Mudhra Policy Approval Committee and need to be approved by the CCA before they become effective. Updates can be a new document containing the revised CPS or it can contain only the updated information. Proposed new versions or updates shall be posted in e-Mudhra repository.

8.1.1. Items that Can Change Without Notification
e-Mudhra will notify non-material changes such as corrections of typographical errors, changes to URLs, and changes to contact information to the CCA. These changes will be updated in the next release of CPS with the approval of CCA.

8.1.2. Items that Can Change with Notification

8.1.2.1 List of Items
All updates, except those covered in section 8.1.1, to the CPS shall require notification prior to becoming effective.

8.1.2.2 Notification Mechanism
Except as noted under section 8.1.1, e-Mudhra Policy Approval Committee shall submit the proposed updates in electronic and/or paper form to the CCA for approval. After obtaining the CCA's approval the proposed updates to the CPS shall be posted in e-Mudhra repository, which is located at www.e-Mudhra.com/repository/cps

8.2 Publication And Notification Procedures

8.2.1 Items not published in the CPS
Security documents considered confidential by e-Mudhra are not disclosed to the public.

8.2.2 Distribution of the CPS
This latest version of this CPS is available for viewing in electronic form within e-Mudhra repository at www.e-Mudhra.com/repository/cps

e-Mudhra also makes the CPS available upon request sent to: info@e-mudhra.com
The paper copy of the CPS is available from e-Mudhra upon requests sent to:

e-Mudhra,
eMudhra Consumer Services Ltd.,
3rd Floor, Sai Arcade,
Outer Ring Road,
Devarabeesanahalli,
Bangalore - 560036

Karnataka, India
Phone: +91 80 43360000

Email: info@e-mudhra.com
Website: www.e-Mudhra.com

8.3 CPS Approval Procedures
The CPS purported for use in e-Mudhra PKI as approved by the e-Mudhra Policy Approval Committee must be finally approved by the CCA.
9. GLOSSARY

9.1 Definitions

A DIGITAL SIGNATURE CERTIFICATE
To demonstrate approval of a Digital signature certificate by a Digital signature certificate applicant while knowing or having notice of its informational contents.

ACCESS
Gaining entry into, instructing or communicating with the logical, arithmetical, or memory function resources of a computer, computer system or computer network;

ACCESS CONTROL
The process of limiting access to the resources of a computer system only to authorized users, programs or other computer systems.

AUTHORITY REVOCATION LIST (ARL)
A list of revoked Certifying Authority Certificates. An ARL is a CRL for Certifying Authority cross-Certificates.

ARCHIVE
To store records and associated journals for a given period of time for security, backup, or auditing purposes.

ASYMMETRIC CRYPTO SYSTEM
A system of a secure key pair consisting of a private key for creating a Digital Signature and a public key to verify the Digital Signature. Detection

AUDIT
A procedure used to validate that controls are in place and adequate for their purposes. Includes recording and analyzing activities to detect intrusions or abuses into an information system. Inadequacies found by an audit are reported to appropriate management personnel.

AUDIT TRAIL
A chronological record of system activities providing documentary evidence of processing that enables management staff to reconstruct, review, and examine the sequence of states and activities surrounding or leading to each event in the path of a transaction from its inception to output of final results. Confirm

AUTHENTICATION
A process used to confirm the identity of a person or to prove the integrity of specific information. Message authentication involves determining its source and verifying that it has not been modified or replaced in transit. (See also VERIFY (a DIGITAL SIGNATURE))

AUTHORIZATION
The granting of rights, including the ability to access specific information or resources.
AVAILABILITY
The extent to which information or processes are reasonably accessible and usable, upon demand, by an authorized entity, allowing authorized access to resources and timely performance of time-critical operations.

BACKUP
The process of copying critical information, data and software for the purpose of recovering essential processing back to the time the backup was taken.

CERTIFICATE
A Digital signature certificate issued by Certifying Authority.

CERTIFICATE CHAIN
An ordered list of Certificates containing an end-user Subscriber Certificate and Certifying Authority Certificates (See VALID CERTIFICATE).

CERTIFICATE EXPIRATION
The time and date specified in the Digital signature certificate when the operational period ends, without regard to any earlier suspension or revocation.

CERTIFICATE EXTENSION
An extension field to a Digital signature certificate which may convey additional information about the public key being certified, the certified Subscriber, the Digital signature certificate issuer, and/or the certification process. Standard extensions are defined in Amendment 1 to ISO/IEC 9594-8:1995 (X.509). Custom extensions can also be defined by communities of interest. Render

CERTIFICATE ISSUANCE
The actions performed by a Certifying Authority in creating a Digital Signature Certificate and notifying the Digital signature certificate applicant (anticipated to become a Subscriber) listed in the Digital signature certificate of its contents.

CERTIFICATE MANAGEMENT [MANAGEMENT OF DIGITAL SIGNATURE CERTIFICATE]
Certificate management includes, but is not limited to, storage, distribution, dissemination, accounting, publication, compromise, recovery, revocation, suspension and administration of Digital signature certificates. A Certifying Authority undertakes Digital signature certificate management functions by serving as a Registration Authority for Subscriber Digital signature certificates. A Certifying Authority designates issued and accepted Digital signature certificates as valid by publication.

CERTIFICATE POLICY
A specialized form of administrative policy tuned to electronic transactions performed during Digital signature certificate management. A Certificate Policy addresses all aspects associated with the generation, production, distribution, accounting, compromise recovery and administration of Digital signature certificates. Indirectly, a Certificate policy can also govern the transactions conducted using a communications system protected by a
Certificate based security system. By controlling critical Certificate extensions, such policies and associated enforcement technology can support provision of the security services required by particular applications.

CERTIFICATE REVOCATION (SEE REVOKE A CERTIFICATE) CERTIFICATE REVOCATION LIST (CRL)
A periodically (or exigently) issued list, digitally signed by a Certifying Authority, of identified Digital signature certificates that have been suspended or revoked prior to their expiration dates. The list generally indicates the CRL issuer's name, the date of issue, the date of the next scheduled CRL issue, the suspended or revoked Digital signature certificates' serial numbers, and the specific times and reasons for suspension and revocation.

CERTIFICATE SERIAL NUMBER
A value that unambiguously identifies a Digital signature certificate generated by a Certifying Authority.

CERTIFICATION / CERTIFY
The process of issuing a Digital signature certificate by a Certifying Authority.

CERTIFYING AUTHORITY SYSTEM
All the hardware and software system (e.g. Computer, PKI servers, network devices etc.) used by the Certifying Authority for generation, production, issue and management of Digital signature certificate.

CERTIFICATION PRACTICE STATEMENT (CPS)
A statement issued by a Certifying Authority to specify the practices that the Certifying Authority employs in issuing Digital signature certificates.

CERTIFIER (See ISSUING AUTHORITY) CHALLENGE PHRASE
A set of numbers and/or letters that are chosen by a Digital signature certificate applicant, communicated to the Certifying Authority with a Digital signature certificate application, and used by the Certifying Authority to authenticate the Subscriber for various purposes as required by the Certification Practice Statement. A challenge phrase is also used by a secret shareholder to authenticate himself, herself, or itself to a secret share issuer.

CERTIFICATE CLASS
A Digital signature certificate of a specified level of trust.

CLIENT APPLICATION
An application that runs on an electronic device and relies on a server to perform some operation.

COMMON KEY
Some systems of cryptographic hardware require arming through a secret-sharing process and require that the last of these shares remain physically attached to the hardware in order for it to stay armed. In this case, “common key” refers to this last share. It is not assumed to be secret as it is not continually in an individual’s possession.
COMMUNICATION/NETWORK SYSTEM
A set of related, remotely connected devices and communications facilities including more than one computer system with the capability to transmit data among them through the communications facilities (covering ISDN, lease lines, dial-up, LAN, WAN, etc.).

COMPROMISE
A violation (or suspected violation) of a security policy, in which an unauthorized disclosure of, or loss of control over, sensitive information may have occurred. (*Cf., DATA INTEGRITY*)

COMPUTER
Any electronic, magnetic, optical or other high-speed data processing device or system which performs logical, arithmetic, and memory functions by manipulations of electronic, magnetic or optical impulses, and includes all input, output, processing, storage, computer software, or communication facilities which are connected or related to the computer in a computer system or computer network.

CONFIDENTIALITY
The condition in which sensitive data is kept secret and disclosed only to authorized parties.

CONFIRM
To ascertain through appropriate inquiry and investigation. (*See also AUTHENTICATION; VERIFY A DIGITAL SIGNATURE*)

CONTINGENCY PLANS
The establishment of emergency response, back up operation, and post-disaster recovery processes maintained by an information processing facility or for an information system. Establish the strategy for recovering from unplanned disruption of information processing operations. The strategy includes the identification and priority of what must be done, who performs the required action, and what tools must be used.

A document developed in conjunction with application owners and maintained at the primary and backup computer installation, which describes procedures and identifies the personnel necessary to respond to abnormal situations such as disasters. Contingency plans help managers ensure that computer application owners continue to process (with or without computers) mission-critical applications in the event that computer support is interrupted.

CONTROLS
Measures taken to ensure the integrity and quality of a process.

CORRESPOND
To belong to the same key pair. (*See also PUBLIC KEY; PRIVATE KEY*)

CRITICAL INFORMATION
Data determined by the data owner as mission critical or essential to business purposes.

CROSS-CERTIFICATE
A Certificate used to establish a trust relationship between two Certifying Authorities.
CRYPTOGRAPHY (See also PUBLIC KEY CRYPTOGRAPHY)
The mathematical science used to secure the confidentiality and authentication of data by replacing it with a transformed version that can be reconverted to reveal the original data only by someone holding the proper cryptographic algorithm and key. A discipline that embodies the principles, means, and methods for transforming data in order to hide its information content, prevent its undetected modification, and/or prevent its unauthorized uses.

DAMAGE
Means to destroy, alter, delete, add, modify or rearrange any digital resource by any means.

DATA
Means a representation of information, knowledge, facts, concepts or instructions which are being prepared or have been prepared in a formalized manner, and is intended to be processed, is being processed or has been processed in a digital system or electronic network, and may be in any form (including printouts magnetic or optical storage media, punched cards, punched tapes) or stored internally in the memory of an electronic device.

DATA CONFIDENTIALITY (See CONFIDENTIALITY)

DIGITAL SIGNATURE CERTIFICATE APPLICANT
A person that requests the issuance of a public key Digital signature certificate by a Certifying Authority. (See also CA APPLICANT; SUBSCRIBER)

DIGITAL SIGNATURE CERTIFICATE APPLICATION
A request from a Digital signature certificate applicant (or authorized agent) to a Certifying Authority for the issuance of a Digital signature certificate. (See also CERTIFICATE APPLICANT; CERTIFICATE SIGNING REQUEST)

DIGITAL SIGNATURE
Means authentication of any electronic record by a Subscriber by means of an electronic method or procedure in accordance with the provisions of section 3 of the Information Technology Act, 2000.

DIGITAL SIGNATURE CERTIFICATE
Means a Digital signature certificate issued under sub-section (4) of section 35 of the Information Technology Act, 2000.

DISTINGUISHED NAME
A set of data that identifies a real-world entity, such as a person in a digital context.

DOCUMENT
A record consisting of information inscribed on a tangible medium such as paper rather than digital-based information. (See also MESSAGE; RECORD)
ELECTRONIC FORM
With reference to information means any information generated, sent, received or stored in media, magnetic, optical, device memory, microfilm, electronic device generated microfiche or similar device.

DIGITAL COMMUNICATION ADDRESS
Messages sent, received or forwarded in Digital form via electronic devices based communication mechanism.

ELECTRONIC DEVICE
A device depending on the principles of electronics and using the manipulation of electron flow for its operation. It includes computers, mobiles or any other form of electronic devices.

ELECTRONIC RECORD
Means data, record or data generated, image or sound stored, received or sent in an electronic form or microfilm or electronic devices generated microfiche.

ENCRIPTION
The process of transforming plaintext data into an unintelligible form (cipher text) such that the original data either cannot be recovered (one-way encryption) or cannot be recovered without using an inverse decryption process (two-way encryption).

EXTENSIONS
Extension fields in X.509 v3 Certificates. (See X.509)

FIREWALL/DOUBLE FIREWALL
One of several types of intelligent devices (such as routers or gateways) used to isolate networks. Firewalls make it difficult for attackers to jump from network to network. A double firewall is two firewalls connected together. Double firewalls are used to minimize risk if one firewall gets compromised or provide address translation functions.

FUNCTION
In relation to a an electronic device, includes logic, control, arithmetical process, deletion, storage and retrieval and communication or telecommunication from or within an electronic device.

GENERATE A KEY PAIR
A trustworthy process of creating private keys during Digital signature certificate application whose corresponding public keys are submitted to the applicable Certifying Authority during Digital signature certificate application in a manner that demonstrates the applicant’s capacity to use the private key.

HASH (HASH FUNCTION)
An algorithm that maps or translates one set of bits into another (generally smaller) set in such a way that: (i) A message yields the same result every time the algorithm is executed using the same message as input.
ii) It is computationally infeasible for a message to be derived or reconstituted from the result produced by the algorithm.
It is computationally infeasible to find two different messages that produce the same hash result using the same algorithm.

IDENTIFICATION / IDENTIFY
The process of confirming the identity of a person. Identification is facilitated in public key cryptography by means of Certificates.

IDENTITY
A unique piece of information that marks or signifies a particular entity within a domain. Such information is only unique within a particular domain.

INFORMATION
Includes data, text, images, sound, voice, codes, programmes, software and databases or microfilm or electronic device generated microfiche.

INFORMATION TECHNOLOGY SECURITY
All aspects related to defining, achieving, and maintaining confidentiality, integrity, availability, accountability, authenticity, and reliability.

INFORMATION TECHNOLOGY SECURITY POLICY
Rules, directives and practices that govern how information assets, including sensitive information, are managed, protected and distributed within an organization and its Information Technology systems.

KEY
A sequence of symbols that controls the operation of a cryptographic transformation (E.g. encipherment, decipherment, cryptographic checks function computation, Signature generation, or Signature verification).

KEY GENERATION
The trustworthy process of creating a private key/public key pair.

KEY MANAGEMENT
The administration and use of the generation, registration, certification, deregistration, distribution, installation, storage, archiving, revocation, derivation and destruction of keying material in accordance with a security policy.

KEY PAIR
In an asymmetric crypto system, means a private key and its mathematically related public key, which are so related that the public key can verify a Digital Signature created by the private key.

LICENCE
Means a licence granted to a Certifying Authority.
LOCAL AREA NETWORK (LAN)
A geographically small network of computers and supporting components used by a group or department to share related software and hardware resources.

MANAGEMENT OF DIGITAL SIGNATURE CERTIFICATE (SEE CERTIFICATEMANAGEMENT)

MEDIA
The material or configuration on which data is recorded. Examples include magnetic taps and disks.

MESSAGE
A Digital representation of information; an electronic device based record. A subset of RECORD. (See also RECORD)

NAME
A set of identifying attributes purported to describe an entity of a certain type.

NETWORK
A set of related, remotely connected devices and communications facilities including more than one electronic device system with the capability to transmit data among them through the communications facilities.

NONREPUDIATION
Provides proof of the origin or delivery of data in order to protect the sender against a false denial by the recipient that the data has been received or to protect the recipient against false denial by the sender that the data has been sent. Note: Only a trier of fact (someone with the authority to resolve disputes) can make an ultimate determination of non-repudiation. By way of illustration, a Digital Signature verified pursuant to this Certification Practice Statement can provide proof in support of a determination of non-repudiation by a trier of fact, but does not by itself constitute non-repudiation.

ON-LINE
Communications that provide a real-time connection.

OPERATIONS ZONE
An area where access is limited to personnel who work there and to properly escorted visitors. Operations Zones should be monitored at least periodically, based on a threat risk assessment (TRA), and should preferably be accessible from a Reception Zone.

OPERATIONAL PERIOD
The period starting with the date and time a Digital signature certificate is issued (or on a later date and time certain if stated in the Digital signature certificate) and ending with the date and time on which the Digital signature certificate expires or is earlier suspended or revoked.

ORGANISATION
An entity with which a user is affiliated. An organization may also be a user.
PASSWORD (PASS PHRASE; PIN NUMBER)
Confidential authentication information usually composed of a string of characters used to provide access to an electronic device.

PC CARD (SEE ALSO SMART CARD)
A hardware token compliant with standards promulgated by the Personal Computer Memory Card International Association (PCMCIA) providing expansion capabilities to computers, including the facilitation of information security.

PERSON
Means any company or association or individual or body of individuals, whether incorporated or not.

PERSONAL PRESENCE
The act of appearing (physically rather than virtually or figuratively) before a Certifying Authority or its designee and proving one's identity as a prerequisite to Digital signature certificate issuance under certain circumstances.

PKI (PUBLIC KEY INFRASTRUCTURE) / PKI SERVER
A set of policies, processes, server platforms, software and workstations used for the purpose of administering Digital signature certificates and public-private key pairs, including the ability to generate, issue, maintain, and revoke public key Certificates.

PKI HIERARCHY
A set of Certifying Authorities whose functions are organized according to the principle of delegation of authority and related to each other as subordinate and superior Certifying Authority.

POLICY
A brief document that states the high-level organization position, states the scope, and establishes who is responsible for compliance with the policy and the corresponding standards. Following is an abbreviated example of what a policy may contain:
- Introduction
- Definitions
- Policy Statement identifying the need for “something” (e.g. data security)
- Scope
- People playing a role and their responsibilities
- Statement of Enforcement, including responsibility

PRIVATE KEY
The key of a key pair used to create a Digital Signature.

PROCEDURE
A set of steps performed to ensure that a guideline is met.

PUBLIC KEY
The key of a key pair used to verify a Digital Signature and listed in the Digital signature certificate.

PUBLIC KEY CERTIFICATE (See CERTIFICATE)

PUBLIC KEY CRYPTOGRAPHY (See CRYPTOGRAPHY)
A type of cryptography that uses a key pair of mathematically related cryptographic keys. The public key can be made available to anyone who wishes to use it and can encrypt information or verify a Digital Signature; the private key is kept secret by its holder and can decrypt information or generate a Digital Signature.

PUBLIC KEY INFRASTRUCTURE (PKI)
The architecture, organization, techniques, practices, and procedures that collectively support the implementation and operation of a Certificate-based public key cryptographic system. It includes a set of policies, processes, server platforms, software and workstations, used for the purpose of administering Digital signature certificates and keys.

PUBLIC/PRIVATE KEY PAIR (See PUBLIC KEY; PRIVATE KEY; KEY PAIR)

RECIPIENT (of a DIGITAL SIGNATURE)
A person who receives a Digital Signature and who is in a position to rely on it, whether or not such reliance occurs. (See also RELYING PARTY)

RECORD
Information that is inscribed on a tangible medium (a document) or stored in an electronic or other medium and retrievable in perceivable form. The term “record” is a superset of the two terms “document” and “message”. (See also DOCUMENT; MESSAGE)

RE-ENROLLMENT (See also RENEWAL)

RELY / RELIANCE (on a CERTIFICATE and DIGITAL SIGNATURE)
To accept a Digital Signature and act in a manner that could be detrimental to oneself were the Digital Signature to be ineffective. (See also RELYING PARTY; RECIPIENT)

RELYING PARTY
A recipient who acts in reliance on a Certificate and Digital Signature. (See also RECIPIENT; RELY OR RELIANCE (on a CERTIFICATE and DIGITAL SIGNATURE))

RENEWAL
The process of obtaining a new Digital signature certificate of the same class and type for the same subject once an existing Digital signature certificate has expired.

REPOSITORY
A database of Digital signature certificates and other relevant information accessible on-line.
REPUDIATION (See also NONREPUDIATION)
The denial or attempted denial by an entity involved in a communication of having participated in all or part of the communication.

REVOKE A CERTIFICATE
The process of permanently ending the operational period of a Digital signature certificate from a specified time forward.

RISK
The potential of damage to a system or associated assets that exists as a result of the combination of security threat and vulnerability.

SECRET SHARE
A portion of a cryptographic secret split among a number of physical tokens.

SECURITY PROCEDURE

SECURITY
The quality or state of being protected from unauthorized access or uncontrolled losses or effects. Absolute security is impossible to achieve in practice and the quality of a given security system is relative. Within a state-model security system, security is a specific "state" to be preserved under various operations.

SECURITY POLICY
A document which articulates requirements and good practices regarding the protections maintained by a trustworthy system.

SERIAL NUMBER (See CERTIFICATE SERIAL NUMBER)

SERVER
A computer system that responds to requests from client systems.

SMART CARD
A hardware token that incorporates one or more integrated circuit (IC) chips to implement cryptographic functions and that possesses some inherent resistance to tampering.

S/MIME
A specification for E-mail security exploiting cryptographic message syntax in an Internet MIME environment.

SUBJECT (OF A CERTIFICATE)
The holder of a private key corresponding to a public key. The term “subject” can refer to both the equipment and device that holds a private key and to the individual person, any, who controls that equipment or device. A subject is assigned an unambiguous name, which is bound to the public key contained in the subject’s Digital signature certificate.
SUBJECT NAME
The unambiguous value in the subject name field of a Digital signature certificate, which is bound to the public key.

SUBSCRIBER
A person in whose name the Digital signature certificate is issued.

SUBSCRIBER AGREEMENT
The agreement executed between a Subscriber and a Certifying Authority for the provision of designated public certification services in accordance with this Certification Practice Statement.

SUBSCRIBER INFORMATION
Information supplied to a certification authority as part of a Digital signature certificate application. (See also CERTIFICATE APPLICATION)

SYSTEM ADMINISTRATOR
The person at a computer installation who designs, controls, and manages the use of the computer system.

THREAT
A circumstance or event with the potential to cause harm to a system, including the destruction, unauthorized disclosure, or modification of data and/or denial of service.

TOKEN
A hardware security token containing a user’s private key(s), public key Certificate, and, optionally, a cache of other Certificates, including all Certificates in the user’s certification chain.

TRANSACTION
A electronic device based transfer of business information, which consists of specific processes to facilitate communication over global networks.

TRUST
Generally, the assumption that an entity will behave substantially as expected. Trust may apply only for a specific function. The key role of this term in an authentication framework is to describe the relationship between an authenticating entity and a Certifying Authority. An authenticating entity must be certain that it can trust the Certifying Authority to create only valid and reliable Digital signature certificates, and users of those Digital signature certificates rely upon the authenticating entity’s determination of trust.

TRUSTED POSITION
A role that includes access to or control over cryptographic operations that may materially affect the issuance, use, suspension, or revocation of Digital signature certificates, including operations that restrict access to a repository.
TRUSTWORTHY SYSTEM
Electronic device, software, and procedures that are reasonably secure from intrusion and misuse; provide a reasonable level of availability, reliability, and correct operation; are reasonably suited to performing their intended functions; and enforce the applicable security policy. A trustworthy system is not necessarily a “trusted system” as recognized in classified government nomenclature.

TYPE (OF CERTIFICATE)
The defining properties of a Digital signature certificate, which limit its intended purpose to a class of applications uniquely, associated with that type.

UNIFORM RESOURCE LOCATOR (URL)
A standardized device for identifying and locating certain records and other resources located on the World Wide Web.

USER
An authorized entity that uses a Certificate as applicant, Subscriber, recipient or relying party, but not including the Certifying Authority issuing the Digital signature certificate. (See also CERTIFICATE APPLICANT; ENTITY; PERSON; SUBSCRIBER)

VALIDATION (OF CERTIFICATE APPLICATION)
The process performed by the Certifying Authority or its agent following submission of a Digital signature certificate application as a prerequisite to approval of the application and the issuance of a Digital signature certificate. (See also AUTHENTICATION; SOFTWARE VALIDATION)

VERIFY (A DIGITAL SIGNATURE)
In relation to a Digital Signature, electronic record or public key, with its grammatical variations and cognate expressions means to determine whether —
(a) The initial electronic record was affixed with the Digital Signature by the use of private key corresponding to the public key of the Subscriber;
(b) The initial electronic record is retained intact or has been altered since such electronic record was so affixed with the Digital Signature.

VULNERABILITY
A weakness that could be exploited to cause damage to the system or the assets it contains.

WEB BROWSER
A software application used to locate and display web pages.

WORLD WIDE WEB (WWW)
A hypertext-based, distributed information system in which users may create, edit, or browse hypertext documents. A graphical document publishing and retrieval medium; a collection of linked documents that reside on the Internet.

X.509
The ITU-T (International Telecommunications Union-T) standard for Digital signature certificates. X.509 v3 refers to Certificates containing or capable of containing extensions.
