Information Security Policy

The Root Certifying Authority of India (RCAI), established by the Controller of Certifying Authorities (CCA), is committed to ensure a secure Root CA infrastructure for licensing and regulating Certifying Authorities (CAs). This includes certifying CA public keys, issuing CA certificates, generating Certificate Revocation Lists (CRLs), providing OCSP services, and formulating policies and guidelines.

RCAI upholds the core principles of **Confidentiality, Integrity, Availability, Non-Repudiation and Privacy**, as mandated by the Information Technology Act and Regulation.
